

## **SUGGESTED REVISION TO RECOMMEDATION FOR AGENDA ITEM 5- PROVISION OF A SUSTAINABLE HOUSEHOLD WASTE RECYCLING CENTRE NETWORK**

Recommendation 3.4 in next week's Panel report (Provision of a Sustainable Household Waste Recycling Centre Network) currently reads;

**“That Panel recommends to Cabinet which, if any, of the identified future saving and/or income generation options as outlined in Appendix 3 of this report should be taken forward and brought back to Panel with further detail and a suggested form of stakeholder consultation.”**

After further consideration and advice from the Chief Legal Officer it is suggested a better and hopefully clearer recommendation that delivers the same thing but is sharper about process and next steps is as follows;

**“That Panel recommends to Cabinet that Cabinet agrees which option(s) in Appendix 3 to the report should be considered further and requests that the Chief Executive and Director of Environment brings a paper back to Cabinet Panel and then Cabinet setting out the details of this/these options (including but not limited to how the option(s) would be implemented, the impacts of taking forward the option(s), equality impacts assessments and proposals for public consultation).”**
