

### Relevant Areas Consultation

#### Analysis of response - 15 January 2016

There have been 14 responses to the consultation:

- 11 agreed with the proposal to retain the existing Relevant Areas and made no further comment
  - 2 parents
  - 3 community schools
  - 3 academies
  - 1 primary school
  - 2 unspecified
- 3 disagreed with the proposal
  - 2 parents
  - 1 unspecified ( no further comment)
  - Both parents who disagreed with the proposal appear to have misunderstood the consultation. Their responses state that Redbourn should be moved from Harpenden ( Area 7) to Hemel Hempstead (Area 12) because there are school places available in Hemel Hempstead and there is no capacity in Harpenden until the new secondary school is built. One parent also mentions the changes that St George's school have proposed to their admission arrangements which may limit allocations made to children living outside Harpenden town.
  - If Redbourn was moved to Area 12 the schools in Harpenden would no longer be required to consult with the Redbourn community when proposing changes to their admission arrangements and is not therefore an appropriate proposal.
