Brett Aggregates Limited Planning Application for Quarry on Ellenbrook Fields PL/0755/16

Main Points in Respect of the Application

- Loss of Green belt
- Loss of buffer against urban sprawl between St Albans and Hatfield
- Loss of Wildlife habitat leading to loss of wildlife both endangered and non- endangered
- Loss of local leisure facilities
- Loss of footpaths and rights of way
- Increased noise and air pollution resulting from the operation of the site and traffic created.
- Health concerns
- Traffic congestion on the basis of the 194 lorry movements a day proposed
- Traffic concerns in respect of A1057 Hatfield Road as the main east west route hosting bus routes, ambulances, fire engines etc. A crucial transport link.
- Property values will be affected
- Need to investigate Herts CC and look at the option of a class action for non- disclosure in the past for those having purchased property in the area since 2001.
- No impact recognition of existing activities in the area including, Cemex site, Glinwells, Existing traffic issues, Industrial estate, Oaklands College , Hertfordshire University, Hatfield Business Park.
- No Impact recognition of proposed activities in the area: Cemex application for landfill up to 250 lorry movements a day, Oaklands development, Chester Nurseries development, Radio Nurseries development, Hat 2 development, Symondshyde proposal, Hatfield Green Proposal.
- The fact that the general road infrastructure is inadequate and there is no proposal to change or improve this.
- No consideration of road fragility and in particular Station Road and the bridge and constant damage to Smallford roundabout.
- No fully thought out site access plan
- No consideration of alternative access plans such as from the Hatfield Business Park
- No consideration of or consultation with the National Grid in respect of the Gas Pipeline running through the site.
- No consideration of the historical and archaeological history and value of the site
- No consideration for UXBs on the site.
- Blatant boundary infraction has occurred in the plan in that the mineral extraction area as defined by HCC has been extended in the planning application.
- No consideration of current water courses and in particular effluent output from Popefield farm
- Lack of resident consultation
- Impact post quarrying and reclamation stage not considered, thus not 32 years but longer.
- No consultation with the Ellenbrook Park Preservation Trust
- The site was provided by Goodman as part of the permission for the development of house and industrial units on the airfield site there appears to be no recognition of this and as such the previous permission must be revisited for non-compliance.
- The failure of Goodman and the relevant local councils to establish the Ellenbrook Park Preservation Trust needs to be explained and considered.
- There is no consideration in the proposal as to the sustainability impact and indeed in some areas the exact opposite to sustainability seems to be being proposed.
