### Dispensing Appliance Contractors

Code	Name & Address	Area	Post Code	MSOA
FDR75	Fittleworth Medical Ltd, 140 High Street	Cheshunt, Herts	EN8 0AW	Broxbourne 008

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy
MSOAs in Lower Lea Valley Locality	Corresponding Ward Names	
Broxbourne 006	Flamstead End	<p>This is an urban locality with a population of 7,224; It has a slightly higher level of deprivation compared with the County average and the % living in low income families reliant on means tested benefits is also higher than the Herts average (11% vs 9.4% Herts average); car or van ownership at 88.4% of all households is higher than the Hertfordshire average of 83%; 15.5% of the population are over 65 years which is similar to the average for the county (16%). The number of under 5 year olds (6.7%) is the same as the Herts average. Limited long term illnesses (13%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (27%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are higher than the Herts average (76.4% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Broxbourne or Cheshunt. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are six pharmacies in and around the western outskirts of Cheshunt on the boundary of this ward – one of which is open for 100hours There is an appliance contractor in Cheshunt town centre. There are two pharmacies in Broxbourne.</p> <p>There are also pharmacies in Enfield and Waltham Abbey.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

**NB. There are no Dispensing Appliance Contractors in North Herts**

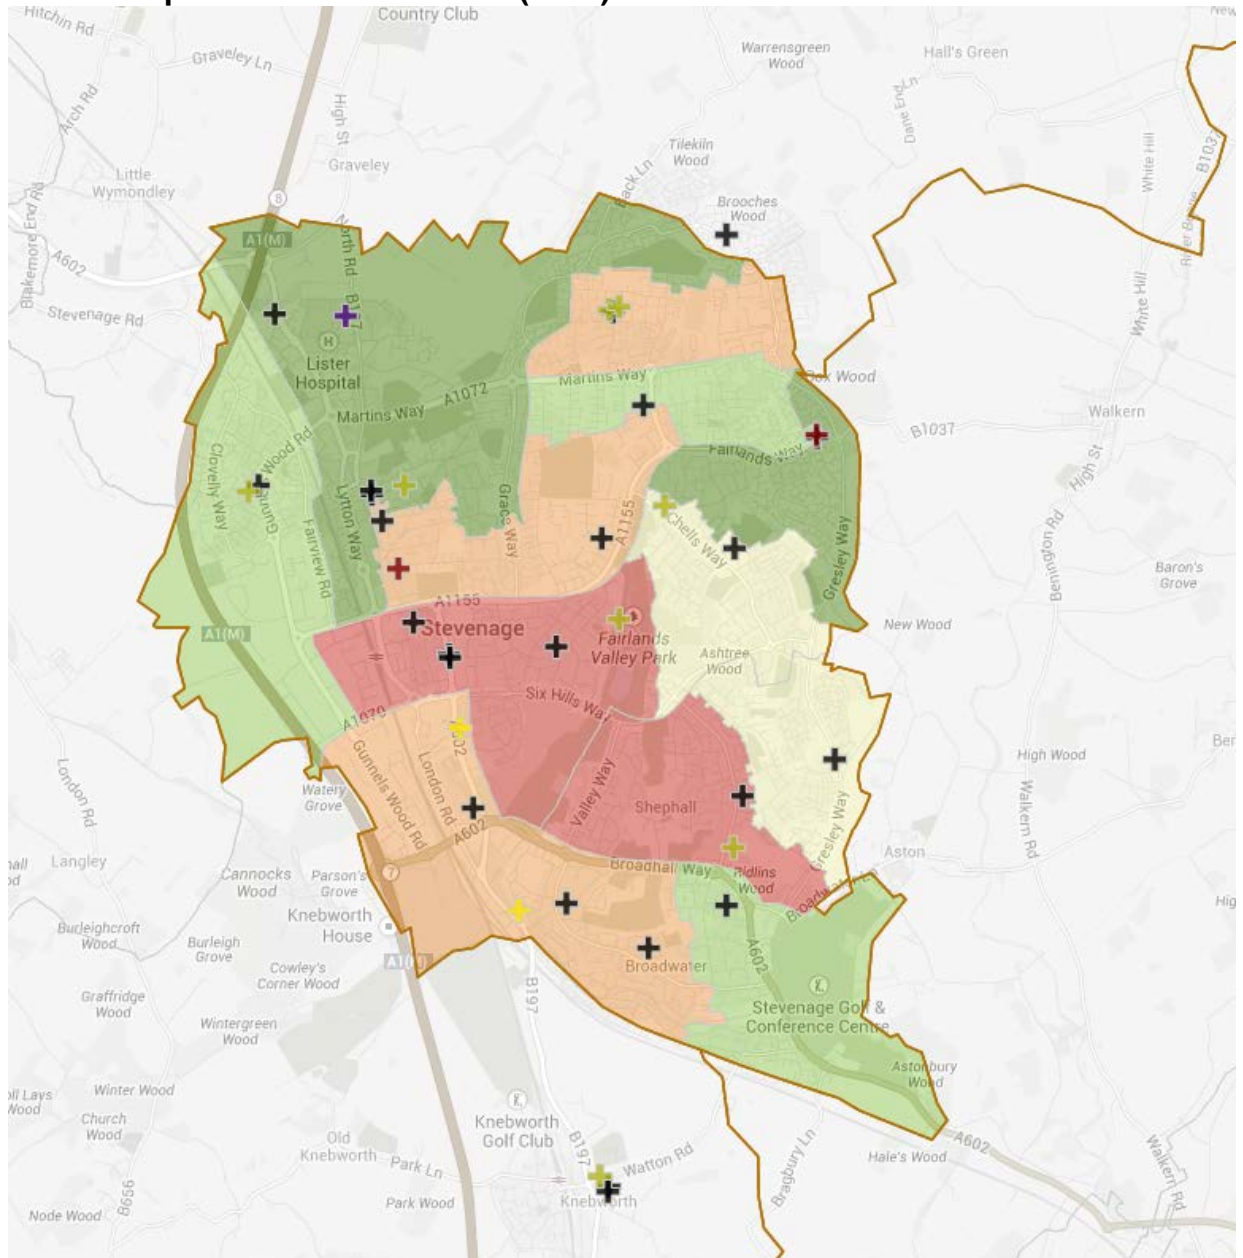

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy
MSOAs in North Herts Locality	Corresponding Ward Names	
North Hertfordshire 007	Letchworth Wilbury	<p>This is an urban locality with a small population of 5,523. It lies on the border of South Bedfordshire. It has a relatively high level of deprivation compared with the county average and the % living in low income families reliant on means tested benefits is also higher than county (16.5% vs 9.4% Herts average); car or van ownership at 76% of all households is lower than the Hertfordshire average of 83%; 15.8% of the population are over 65 years which is similar to the average for the county (16.1%). The number of under 5 year olds (7.1%) is similar to the Herts average (6.8%). Limited long term illnesses (16.5%) are similar to the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (23.6%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are higher than the Herts average (73.8% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Letchworth town centre or GPs in Bedfordshire. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are nine pharmacies in and around the outskirts of Letchworth including a 100 hour pharmacy.</p> <p>Therefore in this small population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
North Hertfordshire 011	Hitchin Walsworth	<p>This is an urban locality with a population of 7,385; its level of deprivation is the same as the Hertfordshire average and the % living in low income families reliant on means tested benefits is also close to the Hertfordshire average (9.9% vs 9.4% Herts average); car or van ownership at 82% of all households is similar to the Hertfordshire average of 83%; 15.3% of the population are over 65 years which is slightly lower than the average for the county (16.1%). The number of under 5 year olds and limited long term illnesses are the same as the Herts average.</p> <p>The estimated percentage of the population aged 16+ with obesity (23.4%) is higher than the Herts average (21.4%). Hospital admissions for alcohol-related harm are lower than the Herts average (62.4% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Letchworth town centre or in Hitchin where there is also a dispensing GP. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are nine pharmacies in and around the outskirts of Letchworth including a 100 hour pharmacy. There is a pharmacy located outside the county in Arlesey, Bedfordshire close to the county border. There are also seven pharmacies in and around the outskirts of Hitchin. Patients registered at the Hitchin dispensing practice who also live a significant distance from a pharmacy have the option to have their medicines dispensed by the practice. These patients will need to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients.</p>

		<p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
North Hertfordshire 013	Hitchin Highbury	<p>This is an urban locality with a population of 7,589. It is one of the least deprived areas in the county also reflected in the % living in low income families reliant on means tested benefits (5.7% vs 9.4% Herts average); car or van ownership at 85% of all households is higher than the Hertfordshire average of 83%; 18.5% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds (6%) is comparable with the Herts average (6.8%). Limited long term illnesses (13.7%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (19.4%) is lower than the Herts average (21.4%). Hospital admissions for alcohol-related harm are low compared with the Herts average (48% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Hitchin town centre, where there is also a dispensing GP, Letchworth or Stevenage or with GPs in Luton or Bedfordshire CCG. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are seven pharmacies in and around the outskirts of Hitchin. Patients registered at the Hitchin dispensing practice who also live a significant distance from a pharmacy have the option to have their medicines dispensed by the practice.</p> <p>These patients may find it inconvenient to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
North Hertfordshire 014	Cadwell Ward and Offa, Hoo and Hitchwood	<p>This is a large rural locality with a population of 9,464. It lies on the border with Luton and Bedfordshire. Deprivation is lower than the Herts average also reflected in the % living in low income families reliant on means tested benefits (7.8% vs 9.4% Herts average); car or van ownership at 89% of all households is higher than the Hertfordshire average of 83%; 20% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds and limited long term illnesses are lower than the Herts average.</p> <p>The estimated percentage of the population aged 16+ with obesity (23.8%) is higher than the Herts average (21.4%). Hospital admissions for alcohol-related harm are low compared with the Herts average (56.8% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Hitchin town centre where there is also a dispensing GP or with GPs in Letchworth or Stevenage or with GPs in Luton or Bedfordshire CCG. There is also a dispensing GP in Whitwell in the centre of the locality. Community pharmacies are located in this area in close proximity to the practices and</p>

		<p>shopping precincts and reflect the usual social flow of the population. There are seven pharmacies in and around the outskirts of Hitchin and nine pharmacies in and around Letchworth, including a 100 hour pharmacy. There are numerous pharmacies in and around Stevenage town centre on the eastern boundary of these wards. Patients registered at the Hitchin or Whitwell dispensing practices, who also live a significant distance from a pharmacy have the option to have their medicines dispensed by their practice.</p> <p>These patients may find it inconvenient to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients.</p> <p>Therefore in this dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

Stevenage 004	Manor	<p>This is an urban locality with a population of 6,304; it is one of the least deprived areas in Hertfordshire; the % living in low income families reliant on means tested benefits is also low (7.8% vs 9.4% Herts average); car or van ownership at 88% of all households is higher than the Hertfordshire average of 83%; 13% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds is lower than the Herts average. Limited long term illnesses (12.6%) are also lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (23.9%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are low compared with the Herts average (48% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs, including one dispensing practice, in Stevenage town centre and its outskirts. Patients registered at the dispensing practice and also living a significant distance from a pharmacy have the option to have their medicines dispensed by the practice.</p> <p>These patients will need to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients.</p> <p>Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are numerous pharmacies in and around the town centre of Stevenage and three in particular that are in close proximity to this ward. There are two 100 hour pharmacies within Stevenage PBC locality.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy
MSOAs in Stort Valley Locality	Corresponding Ward Names	
East Hertfordshire 008	Bishop Stortford South	<p>This is an urban locality with a population of 8,856; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits is therefore very low (3.3% vs 9.4% Herts average); car or van ownership at 92.8% of all households is higher than the Hertfordshire average of 83%; 12% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (5.9%) is comparable with the Herts average (6.8%). Limited long term illnesses (9.2%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (21.4%) is the same as the Herts average and hospital admissions for alcohol-related harm are lower than the Herts average (62.6% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Bishops Stortford or GPs in West Essex. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There is a pharmacy on the ward border at Thorley and three pharmacies, located in the neighbouring town centre of Bishops Stortford and a further pharmacy located on the north eastern outskirts of Bishops Stortford and one located on the site of the Herts and Essex Hospital.</p> <p>Therefore in this affluent, population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
East Hertfordshire 009	Hunsdon, Much Hadham	<p>This a very rural locality comprising villages, hamlets and isolated dwellings with a small highly dispersed population of 5,694; it has a deprivation score slightly above the average for Hertfordshire overall but the % living in low income families reliant on means tested benefits is lower than the Herts average (7.5% vs 9.4%); car or van ownership is very high at 90.5% of all households and is higher than the Hertfordshire average of 83%; 19% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds (5%) is less than the Herts average (6.8%). Limited long term illnesses (17%) are higher than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (21.8%) similar to the Herts average (21.4%) and hospital admissions for alcohol-related harm are high compared with the Herts average (88.6% vs 70.5% respectively).</p> <p>The area includes a national residential epilepsy centre.</p> <p>There is one dispensing GP practice in the locality and the population are likely to be registered with this</p>

		<p>practice or with GPs in Bishops Stortford, or Ware or Sawbridgeworth. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are seven pharmacies located within Bishops Stortford Town Centre and its borders with good access by public transport and road networks. There are two further pharmacies located in Sawbridgeworth, four pharmacies in Ware and a further pharmacy in neighbouring town of Stanstead Abbots. Patients may also easily access pharmacies in Harlow or Stanstead Mountfitchet. Patients who are registered with the dispensing doctor may need to travel to their nearest pharmacy for other pharmaceutical services- such as support for self care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients. The dispensing practice provides a collection and delivery service and a dispensing service on two Saturday mornings per month.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire</p>

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy
MSOAs in Upper Lea Valley	Corresponding Ward Names	
East Hertfordshire 002	Datchworth & Aston, Mundens and Cottered, Walkern	<p>This is a very rural locality with a population of 7,721; deprivation is relatively low and the % living in low income families reliant on means tested benefits (7%) is lower than the Herts average (9.4%) ; car or van ownership at 93% of all households is higher than the Hertfordshire average of 83%; 19.4% of the population are over 65 years which is slightly higher than the average for the county. The number of under 5 year olds is less than the Herts average and limited long term illnesses (13.7%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (22.1%) is slightly higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (51.5% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population is registered with GPs in Buntingford, Puckeridge or in Stevenage town centre, to the west of this locality. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are two pharmacies in Buntingford and one pharmacy in Puckeridge. There are numerous pharmacies in and around Stevenage town centre on the western boundary of these wards. There are also pharmacies in Cambridgeshire in Melbourn and Bassingbourn.</p> <p>Therefore in this dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire</p>
East Hertfordshire 010	Hertford Rural North, Hertford Rural South, Watton-at-Stone	<p>This is a very rural locality with a population of 7,085; it is one of the least deprived areas in the county and % living in low income families reliant on means tested benefits is also low (5.2%); car or van ownership at 93% of all households is higher than the Hertfordshire average of 83%; 18.7% of the population are over 65 years which is slightly higher than the average for the county. The number of under 5 year olds is less than the Herts average and limited long term illnesses (13%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity is the same as the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (54.5% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with the dispensing doctor in Watton-at-Stone or GP surgeries in Hertford, Welwyn Garden City or Ware.</p> <p>Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are six pharmacies in Hertford town centre including a 100 hour pharmacy, and eleven pharmacies, including two, 100 hour pharmacies, located in and around the outskirts of Welwyn Garden City. There are four pharmacies in Ware. Patients registered at the dispensing practice in Watton-at-Stone, who also live a significant distance from a pharmacy have the option to have their medicines dispensed by the practice. These patients may find it inconvenient to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been</p>

		<p>identified as a high priority need by the CCG or patients.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
East Hertfordshire 013	Ware Chadwell, Ware St Mary's	<p>This is a rural locality with a population of 8,350; it is one of the least deprived areas in the county and % living in low income families reliant on means tested benefits is low (5.1%); car or van ownership at 86.6% of all households is higher than the Hertfordshire average of 83%; 14.4% of the population are over 65 years which is similar to the average for the county (16%). The number of under 5 year olds is 6.3% which is similar to the Herts average (6.8%) and limited long term illnesses (12.7%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity is higher (23.7%) than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (56.1% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GP surgeries in Hertford, or Ware.</p> <p>Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are six pharmacies, including a 100 hour pharmacy in Hertford town centre and four pharmacies in Ware.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
East Hertfordshire 016	Hertford Kingsmead	<p>This is a rural locality with a small population of 5,463; it is one of the least deprived areas in the county and % living in low income families reliant on means tested benefits is low (5.6%); car or van ownership at 90% of all households is higher than the Hertfordshire average of 83%; 9.2% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds is 7.9% which is higher than the Herts average (6.8%) and limited long term illnesses (9.4%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity is lower (20.7%) than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (55.3% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GP surgeries in Hertford, or Ware.</p> <p>Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are six pharmacies, including a 100 hour pharmacy, in Hertford town centre and four pharmacies in Ware.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire,</p>

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy
MSOAs in Welhat Locality	Corresponding Ward Names	
Welwyn Hatfield 001	Welwyn East	<p>This is an urban locality with a population of 5,997; it is one of the least deprived areas in the county hence the % living in low income families reliant on means tested benefits (3.2%) is lower than the Herts average (9.4%); car or van ownership at 94% of all households is higher than the Hertfordshire average of 83%; 22.4% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds is less than the Herts average and limited long term illnesses (13%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (18%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (44.2% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with dispensing GP practice in Welwyn in the neighbouring ward or with GPs in Welwyn Garden City or Knebworth. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are pharmacies in Welwyn, Knebworth and Codicote and nine pharmacies, located in around the outskirts of the neighbouring town centre of Welwyn Garden City.</p> <p>Therefore in this affluent, small and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Welwyn Hatfield 008	Howlands	<p>This is an urban locality with a population of 6,862. Deprivation is slightly higher than the Herts average and the % living in low income families reliant on means tested benefits (10.3%) is slightly higher than the Herts average (9.4%); car or van ownership at 81% of all households is lower than the Hertfordshire average of 83%; 13.9% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (7.7%) is higher than the Herts average (6.8%) and limited long term illnesses (14.7%) are lower than the Herts average (16.7%).</p> <p>The estimated percentage of the population aged 16+ with obesity (24.3%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (64.9% vs 70.5% respectively).</p> <p>In the locality there is a GP led health centre which is open 8am-8pm seven days a week, for registered and non-registered patients. There is also the development of the New QEII hospital, which will provide out-patient and diagnostic services. This facility is due to open in 2015.</p> <p>There is no community pharmacy (as of January 2015) in the locality although there are eleven community pharmacies including two 100 hour pharmacies located in and around Welwyn Garden City, including a 100 hour pharmacy in the Peartree ward in the neighbouring locality.</p> <p>While this provision is sufficient to meet the current needs of the population.</p> <p>East and North Herts CCG has embarked on a major service redesign project at the New QEII Hospital in line with national strategic plans for treating more complex patients in primary care. The commissioner's intentions for the site include provision of an integrated NHS pharmacy service with the ability to dispense medicines for both hospital out-patients and GP patients and meet the more complex clinical pharmaceutical needs of patients in primary care. It will support the development of the capability and capacity of the local primary care pharmacy workforce to support patients with long term conditions and complex needs who are being cared for at home.</p> <p>On this basis commissioners have established that this need is unlikely to be addressed by the existing configuration of community pharmacy</p>

		<p>workforce in the area</p> <p>In January 2015 an application for an integrated community pharmacy on site has been approved by NHS England (November 2014) and an appeal to the NHSLA is pending.</p>
Welwyn Hatfield 009	Hollybush	<p>This is an urban locality with a population of 7,602; it has a higher level of deprivation compared with the County average and the % living in low income families reliant on means tested benefits (11.8%) is slightly higher than the Herts average (9.4%); car or van ownership at 78.5% of all households is lower than the Hertfordshire average of 83%; 13% of the population are over 65 years which lower than the average for the county (16%). The number of under 5 year olds (8.6%) is higher than the Herts average (6.8%) and limited long term illnesses (14.5%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (25.6%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are the same as the Herts average..</p> <p>There is a GP surgery on the southern boundary of the ward with Hatfield East Ward and the population are registered with this GP or with other two nearby practices in neighbouring wards in Welwyn Garden City (Peartree and Howlands). Community pharmacies are located in these areas in close proximity to the practices in Peartree and Howlands and reflect the usual social flow of the population. There are eleven pharmacies, located in and around the town centre and outskirts of the Welwyn Garden City, including two 100 hour pharmacies.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Welwyn Hatfield 011	Hatfield East	<p>This is a locality with a population of 6437; it has a higher level of deprivation compared with the County average and the % living in low income families reliant on means tested benefits (12%) is higher than the Herts average (9.4%); car or van ownership at 76% of all households is lower than the Hertfordshire average of 83%; 16% of the population are over 65 years which is the same as the average for the county. The number of under 5 year olds is the same as the Herts average and limited long term illnesses (15.4%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (19%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (61% vs 70.5% respectively).</p> <p>There is a GP surgery on the northern boundary of the ward with Hollybush Ward and the population are registered with this GP or with other nearby practices in neighbouring towns of Hatfield or Welwyn Garden City. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are five pharmacies in and around Hatfield including one 100 hour pharmacy and eleven pharmacies including two 100 hour pharmacies, located in and around the outskirts of the town centre of Welwyn Garden City.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

1. Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy.
MSOAs in Dacorum locality	Corresponding Ward Names	
Dacorum 004	Aldbury Wigginton and Tring East	<p>This is a rural locality with a population of 5,219; the small population is dispersed among villages and hamlets; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (3.5%) is lower than the Herts average (9.4%); car or van ownership at 93.4% of all households is higher than the Hertfordshire average of 83 %; 20.4% of the population are 65 years or over which is higher than the Herts average (16%) and the number of under 5 year olds is lower than the Herts average. Limited long term illnesses (12%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (17.8%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (55.6% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with the dispensing doctor in Tring, or GPs in Bovingdon, Berkhamsted, or Hemel Hempstead town centres, or with GPs across the border in Buckinghamshire and Bedfordshire; community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. Patients registered at the Tring dispensing practices and who also live a significant distance from a pharmacy have the option to have their medicines dispensed by the practice.</p> <p>There are three pharmacies, and four pharmacies located respectively in the neighbouring town centres of Tring and Berkhamsted. Patients who are registered with the dispensing doctor may find it inconvenient to access their nearest pharmacy for other pharmaceutical services- such as support for self-care which are not provided by the dispensing practice. However this has not been identified as a high priority need by the CCG or patients.</p> <p>Therefore in this affluent, rural and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate. There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Dacorum 006	Ashridge and Northchurch	<p>This is an affluent rural locality with a population of 5,501; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (4.8%) is lower than the Herts average (9.4%); car or van ownership at 86.9% of all households is higher than the Hertfordshire average of 83%; 25% of the population are 65 years or over which is higher than the Herts average (16%) and the number of under 5 year olds is lower than the Herts average. Limited long term illnesses (15%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (18%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (57% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Berkhamsted, or Hemel Hempstead and its outskirts; community pharmacies are located in these areas in close proximity to the practices and shopping precincts</p>

		<p>and reflect the usual social flow of the population. The locality is rural and the small population is dispersed among several small villages. There are four pharmacies, located in the neighbouring town centre of Berkhamsted and a further four pharmacies located on the western outskirts of Hemel Hempstead.</p> <p>Therefore in this affluent, rural and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Dacorum 012	Berkhamsted West	<p>This is a urban locality with a population of 6,165; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (6.6%) is lower than the Herts average (9.4%); car or van ownership at 87% of all households is higher than the Hertfordshire average of 83%; 17% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds (7.9%) is higher than the Herts average (6.8%). Limited long term illnesses (12.5%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (17.5%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (58.3% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Berkhamsted, or Hemel Hempstead and its outskirts; community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are four pharmacies, located in the neighbouring town centre of Berkhamsted and a further four pharmacies located on the western outskirts of Hemel Hempstead.</p> <p>Therefore in this affluent, population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Dacorum 014	Berkhamsted East	<p>This is an urban locality with a population of 5,616; it is one of the least deprived areas in the County and the % living in low income families reliant on means tested benefits (5.8%) is lower than the Herts average (9.4%); car or van ownership at 85.8% of all households is higher than the Hertfordshire average of 83%; 15% of the population are over 65 years which is lower than the average for the county. The number of under 5 year olds (8.2%) is higher than the Herts average (6.8%). Limited long term illnesses (11.3%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (18%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (56% vs 70.5% respectively).</p> <p>The population are registered with GPs in Berkhamsted, or Hemel Hempstead and its outskirts; community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are four pharmacies, located in the neighbouring town centre of Berkhamsted and a further four pharmacies</p>

		<p>located on the western outskirts of Hemel Hempstead.</p>
--	--	---

There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary of details of those wards where there is no pharmacy.
MSOAs in St Albans & Harpenden Locality	Corresponding Ward Names	
St Albans 001	Harpenden North	<p>This is an urban locality with a population of 7,289. It lies on the border with South Bedfordshire. It is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (7.2%) is lower than the Herts average (9.4%); car or van ownership at 90.7% of all households is higher than the Hertfordshire average of 83%; 15.3% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (7.7%) is higher than the Herts average (6.8%). Limited long term illnesses (9.5%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (15%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (59.3% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with one of the three GPs in nearby Harpenden town centre, or with GPs across the border in Bedfordshire; community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are four pharmacies located in Harpenden town centre and a further pharmacy on the southern outskirts of the town.</p> <p>Therefore in this affluent and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
St Albans 002	Harpenden East	<p>This is an urban locality with a population of 7,765; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (6.8%) is lower than the Herts average (9.4%); car or van ownership at 87% of all households is higher than the Hertfordshire average of 83%; 14.8% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (8.2%) is higher than the Herts average (6.8%). Limited long term illnesses (12%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (17.3%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (61.5% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with one of the three GPs in nearby Harpenden town centre. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are four pharmacies located in Harpenden town centre and a further pharmacy on the southern outskirts of the town.</p> <p>Therefore in this affluent and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p>

		<p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
St Albans 005	Harpenden South	<p>This is an urban locality with a population of 6,807; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (3.2%) is lower than the Herts average (9.4%); car or van ownership at 93% of all households is higher than the Hertfordshire average of 83%; 19.9% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds (7.43%) is higher than the Herts average (6.8%). Limited long term illnesses (11%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (16.5%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (54.9% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with one of the three GPs in nearby Harpenden town centre. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are four pharmacies located in Harpenden town centre and a further pharmacy on the southern outskirts of the town on the northern border of this ward.</p> <p>Therefore in this affluent and dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
St Albans 010	Clarence, Marshalswick South	<p>This is an urban locality with a population of 6,926; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (3.1%) is lower than the Herts average (9.4%); car or van ownership at 91% of all households is higher than the Hertfordshire average of 83%; 14.6% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (7.3%) is higher than the Herts average (6.8%). Limited long term illnesses (9.7%) are lower than the Herts average of 16.7%. The estimated percentage of the population aged 16+ with obesity (13.8%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (48% vs 70.5% respectively).</p> <p>The population are registered with one of seven GP practices in St Albans. Community Pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are nine pharmacies located in and around St Albans town centre including one 100 hour pharmacy and further ten pharmacies in the surrounding wards.</p> <p>Therefore in this affluent population where the usual flow of the population is to the town centres where the GPs, pharmacies local shops and amenities are located the current level of provision of essential and advanced services is</p>

		<p>adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
St Albans 013	Ashley	<p>This is an urban locality with a population of 6,261; it is one of the least deprived areas in the county and the % living in low income families reliant on means tested benefits (6%) is lower than the Herts average (9.4%); car or van ownership at 89% of all households is higher than the Hertfordshire average of 83%; 10.9% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (8.2%) is higher than the Herts average (6.8%). Limited long term illnesses (10%) are lower than the Herts average of 16.7%.</p> <p>The estimated percentage of the population aged 16+ with obesity (17%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (51.9% vs 70.5% respectively).</p> <p>The population are registered with one of seven GP practices in St Albans. Community Pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population. There are nine pharmacies including one 100 hour pharmacy located in St Albans town centre and further ten pharmacies in the surrounding wards.</p> <p>Therefore in this affluent population where the usual flow of the population is to the town centres where the GPs, pharmacies local shops and amenities are located the current level of provision of essential and advanced services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

Hertfordshire Middle Layer Super Output Areas (MSOAs) with nearest ward boundary (2011)		Summary
MSOAs in WatCom Locality	Corresponding Ward Names	
Three Rivers 003	Croxley Green North, Langleybury and Sarratt	<p>This is an urban locality with a population of 7,358. It lies partly on the border with Buckinghamshire. It has a relatively low level of deprivation for the county and the % living in low income families reliant on means tested benefits (4.7%) is lower than the Herts average (9.4%); car or van ownership at 90% of all households is higher than the Hertfordshire average of 83%; 19.3% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds is lower than the Herts average. Limited long term illnesses (3.6%) are lower than the Herts average (16.7%). The estimated percentage of the population aged 16+ with obesity (19%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (66.2% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Rickmansworth, Croxley Green, Watford, or GPs in eastern Buckinghamshire. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are numerous pharmacies located to the west of Watford and in Watford town centre including two 100 hour pharmacies. There are further pharmacies nearby in Abbots Langley (including one 100 hour pharmacy), Kings Langley and Croxley Green</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Three Rivers 004	Chorleywood East and Rickmansworth	<p>This is an urban locality with a population of 5,955. It lies partly on the border with Buckinghamshire in the north and Hillingdon in the south. It has a relatively low level of deprivation for the county and the % living in low income families reliant on means tested benefits (2.4%) is lower than the Herts average (9.4%); car or van ownership at 90% of all households is higher than the Hertfordshire average of 83%; 21.8% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds is lower than the Herts average. Limited long term illnesses (13.5%) are lower than the Herts average (16.7%).</p> <p>The estimated percentage of the population aged 16+ with obesity (14.9%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are lower than the Herts average (57% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Chorleywood, Rickmansworth, Croxley Green, or GPs in eastern Buckinghamshire or Hillingdon. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are numerous pharmacies located to the west of Watford and in Watford town centre including two 100 hour</p>

		<p>pharmacies. There are further pharmacies nearby in Chorleywood (2), Rickmansworth (6), Croxley Green (2). There are two essential small pharmacies to the east of the locality.</p> <p>Therefore in this affluent, dispersed population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Three Rivers 009	Maple Cross and Mill End	<p>This is an urban locality with a small population of 5,625. It borders with Buckinghamshire and Hillingdon. It has a relatively high level of deprivation compared with the county average and the % living in low income families reliant on means tested benefits (12.5%) is higher than the Herts average (9.4%); car or van ownership at 83% of all households is the same as the Hertfordshire average; 15.4% of the population are over 65 years which is lower than the average for the county (16%). The number of under 5 year olds (7.7%) is higher than the Herts average (6.8%). Limited long term illnesses are lower than the Herts average.</p> <p>The estimated percentage of the population aged 16+ with obesity (22%) is higher than the Herts average (21.4%) and hospital admissions for alcohol-related harm are higher than the Herts average (97.7% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in Chorleywood, Rickmansworth, or GPs in Buckinghamshire or Hillingdon. Community pharmacies are located in these areas in close proximity to the practices and shopping precincts and reflect the usual social flow of the population.</p> <p>There are six pharmacies located in and around Rickmansworth and two pharmacies in Chorleywood there are numerous pharmacies to the west of Watford and in Watford town centre including two 100 hour pharmacies. There are pharmacies in the neighbouring counties in Harefield and Northwood.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local shops and amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>
Watford 007	Nascot	<p>This is an urban locality with a population of 7,794; deprivation levels are less than overall county and the % living in low income families reliant on means tested benefits (6.8%) is lower than the Herts average (9.4%); car or van ownership at 83% of all households is the same the Hertfordshire average; 17.8% of the population are over 65 years which is higher than the average for the county (16%). The number of under 5 year olds (7.4%) is higher than the Herts average (6.8%). Limited long term illnesses (15%) are lower than the Herts average (16.7%).</p> <p>The estimated percentage of the population aged 16+ with obesity (16.6%) is lower than the Herts average (21.4%) and hospital admissions for alcohol-related harm are higher than the Herts average (78.5% vs 70.5% respectively).</p> <p>There are no GP surgeries in the locality and the population are registered with GPs in North Watford. Community pharmacies are located in this area in close proximity to the practices and shopping precincts and reflect the usual social flow of the shops</p>

		<p>and population.</p> <p>There are seven pharmacies including a 100 hour pharmacy located in and around north Watford on the boundaries of this ward.</p> <p>Therefore in this population where the usual social flow of the population is to the town centres where the GPs, pharmacies, local amenities are located the current level of provision of essential and advanced pharmaceutical services is adequate.</p> <p>There is therefore nothing to suggest that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.</p>

**Appendix F:  
Middle Super  
Output Areas  
(MSOAs) in  
Hertfordshire**

## Appendix F: Middle Super Output Areas (MSOAs) in Hertfordshire

“Small area geographies: Super output areas are geographical areas designed to improve the reporting of small area statistics. Middle Super Output Areas (MSOAs) are similar in size to electoral wards, with a population ranging from around 5,000 to 15,000. Hertfordshire has 153 MSOAs. Using this small area geography allows comparison with health indicators routinely available at MSOA level. Health indicators are not usually published at levels below MSOA or ward as small numbers can make them unreliable.”

The official ONS explanation to MSOAs is here: <http://www.ons.gov.uk/ons/guide-method/geography/beginner-s-guide/census/super-output-areas--soas-/index.html>

See below map of MSOAs across Hertfordshire and corresponding ID codes below map.

**Appendix G:  
Methods used for  
identifying providers of  
pharmaceutical services**

## **Appendix G: Methods used for identifying providers of pharmaceutical services**

### **1. Identification of pharmaceutical service providers**

#### Pharmacies within Hertfordshire

A list of pharmacies as of 01/05/2014 including post codes and other information was obtained from NHS England - Hertfordshire and South Midlands Area Team (also known as the NHS England Local Area Team), who maintain the registration database of pharmacies in Hertfordshire and some surrounding counties (currently Northamptonshire, Milton Keynes, Bedfordshire and Luton)

A list of pharmacies that opened and/or closed since the last PNA was published (March 2011) was also obtained from the Local Area Team.

#### Pharmacies outside Hertfordshire

Pharmacies in surrounding counties were obtained from Pharmacy and Medicines Optimisation Team, NHS Central Eastern CSU.

Epact data was used to determine the number of prescriptions issued for Hertfordshire registered patients that were and dispensed in pharmacies out of area.

#### Dispensing doctors (GP) surgeries

Lists of dispensing practices were obtained from NHS England - Hertfordshire and South Midlands Area Team.

The numbers of people registered with a dispensing practice as a dispensing patient were obtained from the Exeter system.

#### Internet (distant selling) pharmacies

A list of internet pharmacies as of 01/05/14 was obtained from NHS England - Hertfordshire and South Midlands Area Team.

#### Dispensing Appliance Contractors (DAC)

Information about DACs as of 01/05/14 was obtained from NHS England - Hertfordshire and South Midlands Area Team.

### **2. Creation of maps**

#### Maps indicating locations of premises providing pharmaceutical services.

Maps showing the locations of premises providing pharmaceutical services were created in InstantAtlas using the list of pharmacies and list of dispensing GP surgeries obtained from NHS England - Hertfordshire and South Midlands Area Team.

**Appendix H:  
Pharmacy Medicines  
and Optimisation  
Team (PMOT) Services**

## APPENDIX H

### Pharmacy Medicines and Optimisation Team (PMOT) Services provided

Details of pharmacy services provided by the pharmacy team are presented below:

- professional, clinical pharmaceutical advice to prescribers and health care practitioners on prescribing policies,
- managed entry of new drugs
- choice of treatments for individual patients;
- co-ordination of medicines required in outbreaks (eg anti-viral, swine 'flu vaccine, antibiotics for meningitis)
- strategic and clinical advice, and co-ordination of pharmacy service and medicines supply to prisoners at HMP the Mount
- development of local medicines and prescribing policies and guidelines
- professional, clinical pharmaceutical advice and support to intermediate care facilities, , and on an ad-hoc basis to local Care Homes

Pharmaceutical advisers in Hertfordshire are aligned to each CCG and individual GP practices to provide expert clinical pharmaceutical advice and support on a day to day basis.

The aim of the medicines optimisation service is to assure that patients get the best possible benefit from medicines within the resources available and that there is safe, efficient and cost-effective use of medicines across the health economy. This will be done by an integrated approach with commissioners, clinicians, managers and patients across all organisations.

None of these	5	3	40

32. What do you like about your pharmacy?
<p><b>Answers:</b></p> <p><b>Convenience:</b> Do other shopping, one stop shop for medical needs to a point, use a variety of pharmacies depending on where working/ shopping.</p> <p><b>Location:</b> near GP/ attached to surgery/ near home</p> <p><b>Parking:</b> easy to park</p> <p><b>Opening hours:</b> late opening/ open until midnight</p> <p><b>Staff:</b> lovely, approachable, always flat out - credit to health service, they know me, very helpful, friendly</p> <p><b>Knowledge and advice:</b> pharmacist is confident and knowledgeable, expertise, good advice re medication and alternatives.</p> <p><b>Service:</b> Always have medication in or can obtain within 24 hours.</p> <p><b>Other:</b> not a lot, no opinion</p>

### 33. What could be improved?

**Answer:**

**Communication:** More engagement with patient/ pharmacist

**Service:** Quicker less chaotic service, do health checks, somewhere, have regular medicines I stock, somewhere more private to speak to pharmacist, privacy, STD screening, improve waiting times, improve turnaround time for prescriptions

**Access:** open at weekends, open longer at weekends/ Saturdays, more appointments, open on a Sunday, open longer hours, closer to home

**Advertising:** What they could offer as an alternative to seeing GP

**Logistics:** Making the pharmacy bigger to allow for patients to queue

### 34. Convenience - we would like to know what is important to you and what may help us deliver a better quality service

Answer Options	Very important	Quite important	Not very important	Not at all important
Getting in and out of the pharmacy building easily, for example, wheelchair access	9	19	12	8
Getting clear information about your medicines and possible side effects	29	14	3	2
Easy to read medicine labels, for example, large print	22	13	9	4
Receiving support with removing medicines from containers, for example, easy lids	11	12	11	14
Receiving support with remembering to take medication, for example, reminder charts	12	12	12	12

**Please suggest anything else that may help us deliver a quality service**

**Advertising:** plus more visible signs of where pharmacy is on high street, staff training, receptionist to complete customer service training

**Staff:** Training, more consistency of staff / less staff changes so they know you and can offer better advice , consistent knowledge, more staff at big pharmacies, usually answer my questions knowledgeably

**Prescription collection:** First time prescriptions marked so pharmacists can engage directly with patients on collection, streamlining process of getting repeat prescriptions, text message service to let you know prescription is ready, collect repeat prescriptions from another counter to save queuing

**Appointments:** automatic booking for follow up appointments for new medicines, chairs in pharmacy for waiting

**Opening times:** More pharmacies opening later, extended/ longer opening times

**Stock:** stocking enough of main medications

**Privacy:** Privacy and access

**Overall service:** Just keep up the good work, my pharmacy offers all that I need.

**Other services:** Provision of PILs, how to dispose of medicines, give advice on minor issues

**35. Do you have an illness or heart problem that requires regular visits to your doctor? (tick one or more boxes as appropriate)**

<b>Illness/ condition</b>	<b>3</b>
<b>High Blood Pressure</b>	<b>4</b>
<b>Kidney Disease</b>	<b>1</b>
<b>Asthma or respiratory problems</b>	<b>9</b>
<b>Heart problems</b>	<b>2</b>

<b>Chinese</b>	<b>0</b>
<b>Any other ethnic group</b>	<b>0</b>

39. Please state the first part of your postcode (for example, SG1)	
Post code:	AL1 (x3), AL4, AL7, AL8 (x3), AL10, CB11,HP1 (x3), HP2 (x2), HP5, EN7 (x3), SG1 (x6), SG2 (x5),SG3, SG5 (x2), SG6 (x2), SG7, SG12, SG13 (x4), SG14 (x2), WD1, WD3 (x2), WD17, WD25

40. Do you consider yourself to have a disability?	
Answer Options	Please tick box as appropriate
Yes	10
No	38

## Patient survey (dispensing doctors service) - Results

### Your views (2014) - Dispensing services in Hertfordshire

**Results : 3 people responded in total.**

**18. What time of day do you generally use your GP dispensary?**

Answer Options	Please tick box as appropriate
Before 9am	
9am - 6pm	3 responses
After 6pm	

**19. When during the week do you generally use your GP dispensary?**

Answer Options	Please tick box as appropriate
Weekday (Monday - Friday)	3 responses
Saturday	
Sunday	

**20. What time of day would you most prefer to use your GP dispensary?**

Answer Options	Please tick box as appropriate
Before 9am	1 response
9am - 6pm	2 responses
After 6pm	

**21. When during the week would you prefer to use your GP dispensary?**

Answer Options	Please tick box as appropriate
Weekday (Monday - Friday)	2 responses
Saturday	1 response
Sunday	

**22. On average, how often do you use your GP dispensary?**

Answer Options	Please tick box as appropriate
Weekly	
Monthly	1 response
Every three months	1 response
Every six months	
Other (please give details)	1 response (after GP visit if medication required)

23. How do you travel to your pharmacy?	
Answer Options	Please tick all boxes that apply
By public transport	
By car	2 responses
By foot	1 response
By cycle	

24. About your experience using a GP dispensary (Please tick a box for each statement)					
Answer Options	Always	Usually	Sometimes	Rarely	Never
a) My dispensing doctor stocks my medication	2 responses	1 response			
b) The dispensary staff know about me and my medication		2 responses		1 response	
c) There is some privacy when I want to speak to the dispensary staff					3 responses
d) I use the dispensary prescription ordering service	1 response				2 responses
e) My dispensing doctor offers advice on other NHS services			2 responses	1 response	
f) I use the local pharmacy for other services (please state which services you use)					

25. In the last 12 months, have you experienced problems accessing the dispensary at your GP practice?	
Answer Options	Please tick box as appropriate
Yes	
No	3 responses
If you ticked yes, please explain what happened:	

26. What do you like about the dispensary at your GP practice?
Answer:
<ul style="list-style-type: none"> <li>• Lovely staff, always flat out and busy though</li> <li>• Convenience and car parking</li> <li>• Having medication on site is helpful</li> </ul>

**27. What could be improved?**

**Answer:**

- Make the pharmacy a little larger as there is always a queue and patients have nowhere to stand
- Privacy
- More discreet service as very close to waiting room

**28. We would like to know what is important to you and what may help us deliver a better quality service**

Answer Options	Very important	Quite important	Not very important	Not at all important
Getting in and out of the building easily, for example, wheelchair access	2 responses		1 response

## **Appendix O: PNA Consultation Report**

## Appendix O

### Draft PNA Consultation Report

A formal consultation was undertaken on the draft Herts PNA from 7<sup>th</sup> October 2014 until 7 December 2014. The following groups were consulted in line with the regulations.

Regulation 8 requirement	Local Consultee	No of responses received
(a)the Local Pharmaceutical Committee (b)any Local Medical Committee for its area (including any Local Medical Committee for part of its area or for its area and that of all or part of the area of one or more other HWBs);	Herts Local Pharmaceutical Committee	1 .( 247 contractors consulted).
(b)any Local Medical Committee for its area (including any Local Medical Committee for part of its area or for its area and that of all or part of the area of one or more other HWBs);	Herts & Beds Local Medical Committee	0
(c)any persons on the pharmaceutical lists and any dispensing doctors list for its area	All Herts Community Pharmacy contractors and all Herts dispensing doctors (N =263)	2
(d)any LPS chemist in its area with whom the NHSCB has made arrangements for the provision of any local pharmaceutical services;	All Herts ESPLPS chemists (N =10)	See above
(e)any Local Healthwatch organisation for its area, and any other patient, consumer or community group in its area which in the opinion of HWB1 has an interest in the provision of pharmaceutical services in its area; and	Herts Healthwatch	1
(f)any NHS trust or NHS foundation trust in its area	East & North Herts NHS Trust West Herts NHS Trust Hertfordshire Partnership Foundation Trust East & North Herts CCG Herts Valleys CCG	0  2 1
(g)the NHSCB; and	NHS England, Herts & South Midlands Area Team	1
(h)any neighbouring HWB	Cambridge HWB Buckinghamshire HWB Central Bedfordshire HWB Luton HWB Essex HWB Hillingdon HWB Harrow HWB Barnet HWB Enfield HWB	0

The consultation questions are detailed as follows:

**Pharmaceutical Needs Assessment (PNA)**

Consultation Response Form

Hertfordshire Health and Wellbeing Board is consulting on the draft Hertfordshire PNA and welcome all views and comments.

**The consultation period will run from 7th October to 7th December 2014.**

The PNA will be reviewed in light of all comments received and the final PNA will be published in February 2015. To give us your views on the draft PNA, please complete this consultation response form and return it by email to: [Chris.Gunning@enhertscg.nhs.uk](mailto:Chris.Gunning@enhertscg.nhs.uk) or by post to:

**PLEASE USE THIS FORM TO GIVE HERTFORDSHIRE HEALTH AND WELLBEING BOARD YOUR VIEWS ON THE DRAFT PHARMACEUTICAL NEEDS ASSESSMENT (PNA)**

**Question 1: Do you feel that the purpose of the PNA has been explained sufficiently?**

Yes

No

**If no, please explain why**

**Question 2: Do you agree with the key findings about pharmaceutical services in Hertfordshire?**

Yes

No

**If no, please explain why**

**Question 3: Do you feel the information contained within the PNA adequately reflects the current provision by community pharmacy or Dispensing GPs within Hertfordshire?**

Yes

No

**If no, please explain why**

**Question 4: Do you feel the needs of the population of Hertfordshire have been adequately reflected?**

Yes

No

**If no, please explain why**

**Question 5: Are there any pharmaceutical services currently provided that you are aware of that are not currently highlighted within the PNA?**

Yes

No

**If no, please explain**

**Question 6: Do you agree that pharmacy services are available at convenient locations and opening times?**

Yes

No

**If no, please explain**

**Question 7 for Community Pharmacies only**

**Question 7: Has the PNA given you adequate information to inform your own future service provision?**

Yes

No

**If no, please explain why**

**Question 8: Is there any additional information that you feel should be included?**

Yes

No

**If yes, please let us know what additional information should be included**

**Question 9: Do you have any other comments?**

Yes

No

**If yes, please write your comments below**

### About you

This helps us to know if we have responses from a broad range of people. You can leave blank any questions you prefer not to answer.

Your name	
Email address	

Are you responding:

1. As a member of the public
2. As a health or social care professional
3. As a community pharmacy contractor
4. On behalf of an organisation
5. Other

Please state:

Please state:

Do you consider yourself to have a disability?

Yes

No

**The RESPONSES TO PNA CONSULTATION QUESTIONNAIRE**

<b>Route</b>	<b>Customer</b>	<b>Comment</b>	<b>Received</b>	<b>Response</b>
Internal Email	ENHCCG	How might Pharmacists support those with dementia and carers? The numbers affected will increase as the population ages.	19/9/14	The health topics of Dementia and Carers have been included in Section 6 of the PNA and also in the summary table 32.
Meeting 22.10.14 Email	NHS HVCCG Planned and Primary Care Board	Request that minor ailments assessment undertaken previously be included as an addendum. Has any PNA been undertaken for access to pharmacists out of hours for minor ailments to avoid patients ending up in A&E? The dispensing practice in Croxley is a branch surgery of New Road practice. Hence is very small and only open from 9a.m. to 12p.m.	23/10/14	The previous minor ailment pilot in SE Herts was carried out before 2007 and not considered relevant in this PNA. No assessment for pharmacists providing a minor ailments service out of hours has been done. Minor ailments has been added to the PNA as a potential local service for commissioners in table 32. Commissioners may wish to consider as a service to relieve winter pressures.  GP opening hours noted and relevant changes made.
Meeting Farnham	Herts County Council	Feedback and confirmation given verbally on gaps in services for sexual health, obesity, smoking, drugs and alcohol and		Amendments and additions made to relevant sections in

House Stevenage 22/10/14	Public Health Leads & Pharmacy Consultant	<p>infection control.</p> <p>Smoking Lead: Specifics. Replace, where appropriate, the terms 'smoking cessation' and 'Stop Smoking' with Stopping Smoking and Stop Smoking Service.</p> <p>PNA 'future' section– Clarify developments at the New QEII and relevance to pharmaceutical services.</p> <p>Table 32 – Service Gaps etc. Column one: remove 'Identified PH' and just keep 'service gaps'.</p> <p>Column 5 – 'Future potential for service development' to add 'for consideration by appropriate commissioner'</p> <p>Additional resources being made available for Comm.</p> <p>Pharmacists about Obesity. Include in table and make ref to health watch website.</p> <p>Needle exchange: Currently 28 providers. Are there any gaps in provision?</p>		<p>section 6</p> <p>New QEII section amended and included in 5.2 –Future new developments</p> <p>Table 32 headings changed and obesity section amended to include reference to PH resources.</p> <p>No relevant link in Herts Healthwatch website found <a href="http://www.healthwatchhertfordshire.co.uk">http://www.healthwatchhertfordshire.co.uk</a></p> <p>Public Health lead confirmed no known gaps in NE provision.</p>
Web based article	Dispensing Doctors Association	<p><a href="http://www.dispensingdoctor.org/comments.php?id=3433">http://www.dispensingdoctor.org/comments.php?id=3433</a></p> <p>Concerns expressed that some rural areas with dispensing doctors, highlighted in PNA, may now receive applications for community pharmacies.</p>		MSOA analysis carried out and checked for Much Hadham. No change to PNA made.
Meeting	Pharmacy Consultant HCC	<p>Overall comments to be taken into consideration</p> <p>Messages appear in three places so any changes in document note for any updating.</p> <p>The document states that there are enough community pharmacies in Hertfordshire and no more are needed. However it also states that there may be potential for pharmaceutical services in one area.</p>	30/10/14	<p>Noted that items appear in three places. No changes made to the PNA document design.</p> <p>One MSOA has been assessed to indicate that there may be a small potential for pharmaceutical services where there are pharmaceutical services provided by a dispensing</p>

				doctor and therefore no full essential services being provided.
Meeting	LPC Executive Officer	<p>A meeting to review and discuss LPC feedback was held. LPC submitted a formal note regarding their feedback.</p> <ul style="list-style-type: none"> <li>- LPC would have liked more input prior to the draft going out for consultation.</li> <li>- Requested Exec summary to be separate document.</li> <li>- Introduction – would like some reference as to where more detail can be found in full doc.</li> </ul> <p>LPC to send formal document on consultation response.</p>	7/11/14	<p>See process section of the PNA Input was requested via a virtual steering group. Exec summary to be published as a separate document</p> <p>PNA amendments made. Contents page provides details of sections and page numbers.</p> <p>References to CP potential services in Table 32.</p>
PNA form responses		-		
12085569 6, other	Person category not identified	<p>Q 1-4. Yes</p> <p>Q 5. No. There are no services not highlighted</p> <p>Q6. Agree pharmacy services at convenient locations/ opening times</p>	14/10/14	No action/response required.
14634059 91 (NR)	Health care professional	<p>Q 1-3. Yes</p> <p>Q4. Would like to see pharmacy better able to support self-management of health and assist in preventative agenda. Make links with GPs and general population more aware. Pharmacy support to parents of young children could give alternative to GP appointment.</p> <p>Q6. Agree pharmacy services at convenient locations/ opening times.</p> <p>Q8. Additional info. Signposting to 3<sup>rd</sup> sector. Community access health facilities when need = social eg due to isolation.</p>	22/10/14	<p>NHS England commissions the self care and public health promotions elements of the pharmacy contract as mandatory services along with other essential services. NHS 111 service can signpost patients to CPs. CPs are required to signpost also as part of their essential services. This can include to</p>

				the voluntary sector. No action for PNA.
20438328 25	Member of the public	Q 1-4. Yes Q 5. No. There are no services not highlighted Q6. Do not agree that pharmacy services are available at convenient locations/ opening times. Comment: It is harder to find a pharmacy later in eve or on Sundays. Q7. Yes, Q8. No. no other comments.	29/10/14	NHS England commission community pharmacy services and consider gaps in services when determining applications for new pharmacies. There are 16 x 100 hr pharmacies open in the evenings and on Sundays in Herts. This is an increase of 8 since 2011. Other pharmacies also provide some services on Sundays and in the evenings. No change to the PNA made.
RT - Hertfordshire	Community Pharmacist	Q1-2. Yes Q3. No – need more pharmacies that offer other services. Q4. No more services needed in the community. Q6. More high street pharmacy licenses should be granted. Q7. Yes, Q8-9 No.	27/10/14	The PNA assesses and summarises where there are gaps that could be filled by services that pharmacies may be able to provide. Potential services for commissioners to consider for CPs to provide are stated in Table 32. Additions made to Table 32 where relevant.
Email from CW with Response Form attached	(Health and & Wellbeing Manager, HWB) responding on behalf of	Q1. No – In line with the whole document the language used is not accessible to those who do not work in the field with too many acronyms and too much jargon to make it clear Q2. No – Since the document was drafted both Clinical Commissioning Groups have approved Carers Strategies that will require all providers of services to have action plans that	03/12/2014	Meaning of acronyms included in Glossary.  The Public Health needs of Herts are stated in the JSNA and a 2 page summary is

	<p>Carers in Hertfordshire.</p>	<p>include duties to identify carers, provide a quality service to them, demonstrate outcomes for carers and engage with carers. HVCCG have also agreed to include carers as a 10<sup>th</sup> protected group. We believe this should be reflected in this document and is currently missing.</p> <p>Q3. Did not answer – Comment: Without the information from the surveys of pharmacists and public and with the difficulties understanding the document it is hard to comment on this.</p> <p>Q4. No – The only mention of carers are in the priorities of the Health and Wellbeing Board and HVCCG and on one occasion as an add on to patients and yet we know that many carers manage medication for the person they care for and are the first pick up problems. Carers tell us that they have regular contact with pharmacists but there remain difficulties with pharmacists unable to involve carers in medicines reviews this needs to be addressed. Also pharmacists are well places to support the identification and signposting for support of carers and we feel this need to be reflected in the document.</p> <p>Q5. Yes – Some pharmacists are identifying and signposting carers and we would advocate this should grow. There is also no mention of flu vaccines for carers which previously were available from pharmacies and stopped this year. Bearing in mind that many carers tell us they visit the pharmacy more often</p>	<p>available. Minority Groups are in the JSNA. Sections on carers have been included in the PNA including how pharmacists can support them</p> <p>Eg through:</p> <ul style="list-style-type: none"> <li>• Signposting</li> <li>• Identification</li> <li>• Dementia friends</li> </ul> <p>Noted. Surveys are included in the appendices of the PNA Repeat dispensing is available for suitable patients in all pharmacies.</p> <p>MUR contractual requirements are governed by the NHS Pharmaceutical Services Regulations 2013 and are beyond the remit of the PNA.</p> <p>Seasonal flu vaccination: This year carers can obtain the flu vaccination from their GPs. PHE Commissioners will review the flu vaccination service each year to maximise best uptake of the vaccination by those who should be targeted to receive the vaccination. No change to</p>
--	---------------------------------	--	--

		<p>than GP surgeries this could be a supportive approach, preventing carer breakdown and its associated costs. Q6. Did not answer – Comment: Whilst I have no evidence that they are not, the document does not provide the information in a sufficiently clear way for certain.</p> <p>Q7. Did not answer – No comment</p> <p>Q8. Yes – Feel that data related to caring should be included and any specific barriers to carers accessing pharmacies considered. For instance the repeat dispensing linked to a 100 hours pharmacy could help a carer to maintain employment but only if both are available together and that is not clear. Can repeat dispensing be done at a pharmacy near carers place of work rather than near the GP surgery as this could also help the distance carers? Overall it needs to include an impact assessment for carers in the same way that other minority groups are assessed and in line with carers being a protected group for HVCCG this should include some specific consultation with carers. Current public consultation will not identify carers.</p> <p>Q9. Yes – Generally the impact and opportunity to support carers has been missed and this has real potential to improve services and prevent costly carer breakdown</p>		<p>PNA.</p> <p>Neighbouring pharmacy data updated and corrected.</p>
Email	Essex LPC	<p>Q1. Yes</p> <p>Q2 No – The “gap” in services identified in Much Hadham and Hunsdon in the main draft is not identified as such in the appendix, which correctly states that current services are adequate for this population. The proposed development at the QEII site in Welwyn Garden City is beyond the scope of the NHS (pharmaceutical and Local Pharmaceutical Services) regulations 2013 and as such should not be included in the PNA.</p> <p>Q3. Yes</p> <p>Q4. Yes</p> <p>Q5. No</p>	04/12/2014	<p>Noted. No change to the PNA (see earlier comment). The New QEII development is now moved and included in section 5.2 of the PNA.</p>

		<p>Q6. Yes</p> <p>Q7. N/A</p> <p>Q8. No</p> <p>Q9. Yes – The description of pharmacies in neighbouring Health and Wellbeing Board areas should name the relevant Health and Wellbeing Board and not the CCG. Total Medcare, within Essex Health and Wellbeing Board area is a distance-selling pharmacy.</p>		<p>HWB areas added to List of out of area pharmacies (Appendix D)</p> <p>Noted.</p>
Email	Area Team, NHSE	<p>Q1. Yes</p> <p>Q2. Thank you for giving NHS England's Area Team at Hertfordshire and South Midlands the opportunity to comment on the Hertfordshire Pharmaceutical Needs Assessment. NHS England's area team welcomes the publication of the document as it will be invaluable in assisting the area teams Pharmaceutical Services Regulations Committee in determining and judging applications made under the Pharmaceutical Services Regulations 2013. NHS England welcomes the acknowledgement and growth predictions over the next 3 years and also that broadly the provision of pharmaceutical services across Hertfordshire based on their current location and opening times section 5 concludes that overall there is an adequate provision of these services across Hertfordshire.</p> <p>Q3. NHS England would also wish to note that in 2014/15 (November 2014) 87 community pharmacies in Hertfordshire were commissioned to provide the flu service and the uptake is significantly higher than 2013/14 with 1288 vaccinations given as of November 2014. Please do note that the Flu service initially has been offered to those patients under 65 in the at risk groups.</p> <p>Q4. NHS England acknowledges the identified perceived small potential gap in pharmaceutical services</p>		<p>Community Pharmacy providers of flu vaccination providers included as Appendix Q.</p> <p>MSOA analysis carried out</p>

		<p>Q5. No  Q6. Yes – Very good pharmacy access across Hertfordshire  Q7. N/A  Q8. Although the 1MSOA locality highlight may need the provision of additional pharmaceutical services NHS England would welcome further clarity on the identified need as it contradicts with other areas of the report that suggest that access to community pharmacies is in line with the national average in terms of population size the assumption that the opening hours and locations of the current pharmacy network are adequate.  Q9. NHS England would be interested to note why the application believes that an application for Much Hadham and Hunston wards had not had the required support of the local population i.e. is it relevant to a regulatory decision under the Pharmaceutical Regulations 2005 or 13?</p> <p>NHS England would also wish to note that the new medicines service (NMS) has been extended to a permanent arrangement and no longer has pilot status.</p>		<p>and checked for Much Hadham. No change to PNA made</p> <p>Details of individual applications removed from PNA for consistency. (Decision was under the 2005 regulations and records show that the application was not granted as it did not meet the required criteria). NMS details added to PNA.in section2.7.</p>
Email	Hertfordshire LPC	<p>Q1. Yes in general – The draft PNA does not set out the list of the Enhanced Services that NHS England is able to commission (as from 1st April 2013) in relation to Pharmaceutical Needs Assessments.</p> <p>The definition and example included for “enhanced services” (p.33) is incorrect and we would refer you to the following definition: <a href="http://psnc.org.uk/services-commissioning/locally-commissioned-services/which-commissioner/">http://psnc.org.uk/services-commissioning/locally-commissioned-services/which-commissioner/</a>. Locally</p>	5.12.14	List of enhanced services as detailed in the regulations added to PNA- Section 2.7 and definition revised.

	<p>commissioned services are also defined incorrectly and referred to as enhanced services.</p> <p>What is the evidence for deprivation and the impact of pharmaceutical services (p.28)? There is no clear link between those top 30 priority MSOA areas and the next section which then seems to link pharmaceutical services to health inequalities only. Isn't the PNA about links to all pharmaceutical services in all populations?</p> <p>Could NHS England be asked to comment on the reorganisation that will incorporate others within their Area Team area as this is not referenced on p.18?</p> <p>Q2. No – There are inconsistencies throughout the document, for instance it is stated that many of the identified “gaps” in provision could be met by current providers of pharmaceutical services in Hertfordshire through the appropriate alignment of the essential and/or advanced services elements of the contract to meet patients’ needs. The statement on p.58 states “overall there is adequate provision of these services across Hertfordshire” but it is not clear upon what evidence and health needs this has been based upon. The summary “there is overall no need to commission new community pharmacy contractors to provide essential or advanced services”: the PNA should include some justification for this statement.</p> <p>MSOA East Hertfordshire 003 (Much Hadham and Hunsdon Wards) East and North Herts CCG: There has been no evidence presented that suggest there is a benefit for a community pharmacy to be added in this area.</p>	<p>Reviewed reference to health inequalities.</p> <p>Changes in AT(NHSE) in 1.4.15 included section 2.1</p> <p>Noted. Gaps in services can be met by current providers due to &gt;average no of pharmacies per populations in Herts. &gt;There has been an increase in pharmaceutical services since 2011. No change to the summary. No issues raised regarding lack or type of provision (except UoH). Provision of other essential services (pharm services) not available through the Dispensing GP contract available in this MSOA.</p> <p>Details of individual applications removed from</p>
--	---	--

		<p>The draft PNA quotes examples of specific contract applications that have been considered in the past and identifies one contract application that is currently under consideration: MSOA Welwyn Hatfield 013 (Hatfield South, Hatfield West Wards) East and North Herts CCG and MSOA Welwyn and Hatfield 003 (Howlands Ward) East and North Herts CCG. It is essential to ensure transparency and consistency throughout the PNA and the solution may be to either remove all reference to applications or to include a complete list. There may be value in referencing relevant determinations that had previously been handed down by the NHS Litigation Authority.</p> <p>The draft PNA identifies a need for a community pharmacy in the new QE2 Hospital in Welwyn Garden City (MSOA Welwyn and Hatfield 003 (Howlands Ward) East and North Herts CCG), although it is advises at the same time in 5.1.3.4 that “There is nothing to suggest currently that the population in this locality has higher needs for essential and advanced pharmaceutical services than the rest of the population in Hertfordshire.” There is no basis within any of the evidence and health needs that the new QEII Hospital in this locality should become an integrated community pharmacy. There is no evidence presented that suggests the QEII Hospital is an “exemplar of good pharmacy practice” or that it has the appropriate skillset to become “a training resource” in the area. The LPC does not support the inclusion of this as it is iniquitous that no case has been made for and request that it is removed from the document.</p> <p>It is noteworthy that in July 2014 NHS England refused an</p>	<p>PNA for consistency.</p> <p>PNA has been updated to state current status pending any application appeal rights (Jan 2015).</p> <p>NHSE approved an application in Nov 2014</p> <p>References to exemplar practice removed wording revised. NEW QEII moved to Future developments section.</p> <p>PNA steering group member from ENHT has not made any comments on the development of the PNA and not influenced the commissioners long held planning intentions.</p> <p>This will be done on a case by case basis as developments emerge. No</p>
--	--	--	---

		<p>application for a pharmacy just 0.8 miles away in the Hall Grove Shopping Centre that is adjacent to a large GP practice. The LPC noted that the applicant named on the current application form for a new pharmacy to be located within the new QE2 Hospital, is that of the Chief Pharmacist at the East &amp; North Hertfordshire NHS Trust and whose name is listed amongst those on the list of PNA Steering Group and Stakeholders.</p> <p>The bullet points contained within p.71 are too vague and on the basis of this information a case could be made in any locality within Hertfordshire based on population growth and new housing. There needs to be a more robust assessment of where housing growth will occur and the key factors that will influence when assessing needs for local pharmaceutical services.</p> <p>The summaries and conclusions on pages 69-70 are not based upon the previous evidence presented. There is new information presented ie. “Generally pharmacies in Hertfordshire are located in close proximity to GP practices, shopping centres or precincts...” or “... a new locally commissioned service to ensure in and out of hours access to urgently needed specialist medicines” within the summary that has not previously been identified within the evidence.</p> <p>There is no evidence to suggest that 100 hour pharmacies are essential – “by virtue” (p.50) is not a reference. A case should be made as to why 100 hour pharmacies offer improved access “in and out of hours to patients ... essential to maintain the adequacy of pharmaceutical services in Hertfordshire to meet the needs of the population”.</p>	<p>change to PNA.</p> <p>The primary reference added to PNA and also a reference to Appendix A – maps.</p> <p>“By virtue” removed from PNA. 100 hr pharmacies provide essential access to services. Reduction in hours is not desirable.</p> <p>Neighbouring pharmacy data included as table (Appendix D) and also in maps. Final versions of other PNAs not available.</p> <p>Reference of HLP and quoted included in PNA in section 2.7.2</p> <p>HIV or condom distribution removed HC420.service included in new dementia section.</p> <p>PNA corrected.</p>
--	--	--	---

		<p>It is not clear what other neighbouring PNAs say about the need for pharmaceutical services (p.36) in Hertfordshire. There needs to be a reference to what these other PNAs say and the impact upon Hertfordshire.</p> <p>There is no evidence or reference to support the statement that “People walking into a HLP are twice as likely to set a quit date and stop smoking compared to a non HLP” (p.32). There needs to be a reference to the national evaluation of HLP and its findings: <a href="http://psnc.org.uk/wp-content/uploads/2013/08/HLP-evaluation.pdf">http://psnc.org.uk/wp-content/uploads/2013/08/HLP-evaluation.pdf</a>. HLP is included within the wrong section as it does not fit with medicines optimisation.</p> <p>Q3. No – The list of local pharmacy services provided in Hertfordshire is incorrect (p.33). Community pharmacies are not currently commissioned to provide HIV or condom distribution under sexual health services. There is no mention of the community pharmacy pilot in replacement of HC420.</p> <p>The specialist medicines service is not new and you may find that key commissioners, stakeholders and community pharmacists are unaware of such a service.</p> <p>P.47 There are currently ten community pharmacies contracted to provide ESPLPS not 13. There is no mention whether there is an identified health need that would support the local population if these contracts were to remain if appropriate.</p> <p>NHS vaccination services are omitted from the list of Public Health Services.</p>		<p>ESPLPS numbers corrected in PNA.</p> <p>Vaccination services included in list of commissioned services in PNA. PNA meets the regulations requirements for maps. Additionally individual service providers are listed in sections. PH services are not relevant to the market entry determinations.</p> <p>Map title changed. There may be an on-going development of maps by Herts CC (MJ) aims to provide maps of all services. The map is electronic and colours can be customised. Q4 Refer to Appendix A for services by MSOA. Most gaps can be provided by current workforce through essential services or locally commissioned services</p>
--	--	--	--	--

		<p>The LPC noted an absence of maps showing the current provision of Public Health Services, Enhanced Services and Local Pharmacy Services across the county – up to date service-mapping is critical in informing the commissioning process and in arriving at market entry decisions.</p> <p>Map of Pharmacy Provision and GPs. Title should read Map of Pharmacy Provision and Dispensing GPs. The use of grey and green colours on this map does not contribute to clarity. If the range of indices of Mass Deprivation were mapped in colours ranging from light yellow to brown and the service provider symbols were superimposed then the mapping of services would be more readable and usable when considering market entry applications.</p> <p>Q4. No – The draft PNA includes broad-brush statements on the ability of drawing on the essential services to meet needs without identifying the specific patient groups and wards/MSOAs that would further benefit from those services. The regulations in respect of the advanced and enhanced services do prescribe an element of targeting; however it remains speculative to suggest that most of the gaps in provision could be met by relying on essential services. The PNA would benefit from identifying gaps in provision and clearly setting out how they could be met by the commissioning of appropriate services in relevant wards/MSOAs.</p>		<p>PH leads have identified gaps. Table 32 has signposted opportunities for CPs to provide.</p> <p>There is no identified gap in services to prevent Teenage pregnancy PH services are included in each section.</p> <p>Quote is referenced and included in the PNA.</p> <p>Noted. The population and demography statements are from the Herts JSNA. The JSNA weblink is added to the PNA as a hyperlink.</p> <p>Agreed signpost commissioners to consider</p>
--	--	---	--	--

		<p>The organisation of the Gap Analysis would benefit from re-structuring. Typically the information provided on service gaps is general to the whole of Hertfordshire rather than identifying gaps in specific wards or MSOAs. The gap analysis should be both clear and robust enough to assist with the determination of pharmaceutical applications for market entry. The inclusion of an identified need as well as identified potential services to meet the need should be considered. For example, the draft PNA states that “Teenage pregnancy rates have decreased across Hertfordshire but levels still remains high in some areas.” Despite this, that “identified gap” is not listed in the Gap Analysis. There are many examples similar to this throughout the document that flaw the clarity of this draft PNA.</p> <p>There are gaps within the evidence as it is only based on national information and not information that should be available within Hertfordshire.</p> <p>The quote is not referenced on p.19 and paragraph 2.3 is poorly written and should be amended so that this can be easily understood. The table would be more helpful if it contained current population projections in addition.</p> <p>The section on p.20 is not specific enough about what localities are being referred to. There is not enough evidence or appropriate referencing to support the following statements: “Hertfordshire has a fairly affluent population”, “Recent migration of workers from Eastern Europe, particularly Poland...” “There are some areas (particularly in Watford)...”.</p> <p>There are no references or evidence for the assertions made in any of the households, life expectancy of deprivation paragraphs</p>	<p>JSNA issue. JSNA see separate sections for PH and primary care strategies in Table 32 at end of PNA</p> <p>Priorities of HWB in relation to pharmacy services-LPC provided details included in Appendix P. It is appropriate to highlight where essential &amp; Advanced services can assist. Self-care &amp; signposting added to Table 32 under Falls. Immunisation: Commissioners can choose to increase level of service through enhanced services provided by all providers. Business Continuity plans are covered by Civil Contingence Act. Wording in PNA Section 6.3.14 changed to reflect recommendations. There is little evidence of benefit of Monitored Dose Systems. An SLA is not within the</p>
--	--	--	--

	<p>made on p.21.</p> <p>P.66 “The proportion of people from minority ethnic groups living in Hertfordshire has increased over the past decade. Numbers vary considerably across different area...”. This appears to be in direct contradiction to the information contained within p.20. The assertion on this page “While this PNA identified no gaps in pharmacy services...” is not backed up by evidence and would suggest that this is reviewed particularly as there is a wealth of evidence suggesting that diabetes, for example, is linked to a higher prevalence in minority ethnic groups. Where is the evidence for “over the next 20 years the population in Hertfordshire is expected to grow” with the New Developments section. This is also a repeat from an earlier section.</p> <p>There are no references about the health needs and gaps on p.25-26 and in particular how community pharmacy can support.</p> <p>Q5. Yes – It is inappropriate to recommend that community pharmacists should deal with those at risk of falls only through essential services. TO add in signposting &amp; self-care to table</p> <p>Immunisation should be offered as alternate for all. There is no mention of the low target for healthy two and three years old which community pharmacy could support if commissioned: <a href="http://www.bbc.co.uk/news/health-30218926">http://www.bbc.co.uk/news/health-30218926</a>.</p> <p>What evidence is there to suggest that pharmacies must have</p>	<p>scope of PNA. Noted for commissioners to decide. This element of medicines administration has been changed from inclusion only under care homes in the PNA.</p> <p>Other non NHS services eg delivery services included in the PNA in Section 5.</p> <p>Added into context chapter together with NHS England’s Five Year Forward plan.</p> <p>Carers section added to PNA in section 6.3.15</p> <p>Public Health Sexual Health Lead updated section 6.3.5</p> <p>References made to NHS winter pressures guidance, NHS 111 added to the PNA. NHS Commissioners are sign posted to potential services Community Pharmacies can provide to meet need in Table</p>
--	---	--

		<p>robust business continuity plans in place?</p> <p>Consideration also needs to be given as to how community pharmacy can support older people through monitored dosage systems (MDS) used in the community. There has been an ever increasing demand and need for MDS in the community largely driven by an aging population. There needs to be a clear service level agreement and payment structure for MDS including inclusion and exclusion criteria to meet this need within the community. MDS should not just be mentioned within care homes. A more targeted service for care homes should be addressed through a commissioned service.</p> <p>Pharmacies often provide a “free” delivery service that is not commissioned that is called upon more and more by GPs and District Nurses to conserve their patient contact time but is adding pressure and resources to community pharmacy practices.</p> <p>There is no mention or reference to the national NHS Call to Action (p.25). The LPC would direct you to the Hertfordshire LPC response: <a href="http://www.hertslpc.org.uk/wp-content/uploads/sites/66/2014/02/HERTS_LPC_CTA_response_2014.pdf">http://www.hertslpc.org.uk/wp-content/uploads/sites/66/2014/02/HERTS_LPC_CTA_response_2014.pdf</a>. This Call to Action should be used as a reference to add another key benefit on p.29: “Support to the under capacity in GPs to support general practice services”.</p>	<p>32 To add to table/ appendix P</p> <p>Included as vignette Under Diabetes Targeted MURs included in table 32</p> <p>Included link to Herts LPC website and local audits at section 2.7.2 LPC to provide other examples of HERTS CP audits etc. to include in Appendix P Public Health Services provision by Community Pharmacies is included in Table 32</p> <p>Added reference in background section of PNA of how CP in Herts can help older people. Also addressed in separate PH sections. Separate section on carers to</p>
--	--	---	---

		<p>There is very little mention of the support that community pharmacies currently provide to carers who have regular contact with their pharmacists.</p> <p>Q6. Yes Q7. N/A Q8. Yes – There is no mention of enhanced sexual health services that would benefit from being commissioned ie. HIV screening and condom distribution.</p> <p>There is no mention or evidence presented of how community pharmacy could help provide better quality and resilient urgent care through flu vaccinations, emergency supplies (<a href="http://psnc.org.uk/services-commissioning/locally-commissioned-services/winter/">http://psnc.org.uk/services-commissioning/locally-commissioned-services/winter/</a>) at NHS expense and a minor ailments scheme and the benefits this could bring to the local population: <a href="http://www.pharmacyresearchuk.org/waterway/wp-content/uploads/2014/01/MINA-Study-Final-Report.pdf">http://www.pharmacyresearchuk.org/waterway/wp-content/uploads/2014/01/MINA-Study-Final-Report.pdf</a> as recently evidenced by the Royal Pharmaceutical Society: <a href="http://www.rpharms.com/pressreleases/pr_show.asp?id=2342">http://www.rpharms.com/pressreleases/pr_show.asp?id=2342</a>. There is also no mention of how community pharmacy can work smarter as a disposition within the NHS 111 work stream (<a href="http://www.england.nhs.uk/wp-content/uploads/2014/11/comm-pharm-better-quality-resilient-urgent-care.pdf">http://www.england.nhs.uk/wp-content/uploads/2014/11/comm-pharm-better-quality-resilient-urgent-care.pdf</a>). There is a clear need for pharmacy support to long term conditions ie:</p> <ul style="list-style-type: none"> <li>• COPD (LPC audit: <a href="http://www.hertsipc.org.uk/wp-content/uploads/sites/66/2013/10/COPD-Baseline-Audit-Report-2013-14-Pharmacy-and-Patient.pdf">http://www.hertsipc.org.uk/wp-content/uploads/sites/66/2013/10/COPD-Baseline-Audit-Report-2013-14-Pharmacy-and-Patient.pdf</a> and <a href="http://www.communitypharmacyfuture.org.uk/pages/copd_229724.cfm">http://www.communitypharmacyfuture.org.uk/pages/copd_229724.cfm</a>);</li> <li>• CVD: Hypertension</li> <li>• Diabetes (management of people with diabetes for</li> </ul>	<p>be included plus reference in table</p> <p>Presentation has been improved within the PNA with refs to appendices and a revised summary.</p> <p>Agreed to publish the Executive Summary as a separate doc and include in full document. Glossary to be included</p> <p>Process section reworded to reflect that a virtual steering group was convened and contributions sought from all. Pharmacy and patient views included in PNA as Appendix L.</p>
--	--	---	--

		<p>screening, improved adherence with medicines and reduced blood glucose levels or HbA1c):  <a href="https://www.diabetes.org.uk/upload/Professionals/Publications/Winter%202012/MedicineDigest-winter2012.pdf">https://www.diabetes.org.uk/upload/Professionals/Publications/Winter%202012/MedicineDigest-winter2012.pdf</a></p> <p>The draft PNA does not include a summary of the documented findings of the Overview and Scrutiny Committee which inquired into medicines management issues for vulnerable patients in the community in Hertfordshire.</p> <p>There is no mention of how community pharmacy can support the challenges outlined for identified public health needs and service provision (p.71-73). The health priorities identified by the Health and Wellbeing Board (p.23) should be referenced clearly as to what commissioning gaps there are for community pharmacy to support.</p> <p>Overall the opportunity for community pharmacies to further support carers has been missed particularly through medication reviews and how community pharmacists are well placed to support the identification and signposting for support of carers.</p> <p>Q9. Yes – The overall organisation and presentation of the document is confused. Whole sections are repeated in different sections that causes confusion for the reader that if are kept, need to be referenced to the relevant other section within the document. Tables are inappropriately numbered and references are not properly footnoted so it is confusing to ascertain the</p>		<p>Included in final document.</p> <p>Noted. Further meetings were planned and took place on 22 October, 11 December, and 27 January.</p> <p>Noted. LPC comments are welcomed and have been discussed at several meetings, considered and incorporated where appropriate.</p> <p>Changed in PNA document</p> <p>Changed in PNA document</p> <p>Changed in PNA document</p> <p>Changed in PNA document</p>
--	--	---	--	---

	<p>evidence.</p> <p>It feels as if the Executive Summary was completed before the document and that any evidence within the main body of the document has been written retrospectively.</p> <p>We would suggest that the Executive Summary is separated and becomes a document in its own right.</p> <p>The process underpinning the construct of the document is unclear and the document would benefit from a list of definitions to inform readers. There are examples of statements in the draft PNA which clearly demonstrate that parts of the document have been written without consultation with service providers or users:</p> <ul style="list-style-type: none"> <li>• P.35-36 The statement “In undertaking the PNA, the Hertfordshire HWB sought the views of a wide range of key stakeholders to identify issues that affect the commissioning of pharmaceutical services to meet local health needs and priorities”. This could be considered inaccurate as pharmacies and patients’ contributions have not yet been added. There is no reference as to how many times the steering group met and this is because the steering group did not meet and were only invited to a meeting at short notice. The final version of the draft was not shared with the LPC until 19 September 2014 which was then sent for consultation on 7 October 2014.</li> <li>• P.17 The text states “We have considered the responses from stakeholders...” but as previously identified the feedback from surveys of patient groups and pharmaceutical services providers has not yet been incorporated.</li> <li>• P.18 It is stated “The involvement of patient, carers and service users in the development of the Hertfordshire pharmaceutical needs assessment reflects this goal” – how can this be when this has not yet been incorporated within the document?</li> </ul>	<p>Agreed Keep England ref in PNA. Up to date figures obtained and included in the PNA where available.</p> <p>Updated in PNA to reflect up to date amended MUR directions.</p> <p>Corrected in PNA document.</p>
--	---	---

		<p>All of this suggests that the PNA may have been written without adequate consultation. Should this be the case, the LPC would have concerns that the PNA may not reflect the actual needs of the population and may only express policy makers' perceived needs. In consequence this could reduce the validity of the PNA in informing future applications for inclusion in the Pharmaceutical List.</p> <p>The LPC is concerned that the draft PNA document is a cut-and-paste version of the original PNA from 2011. The process for the 2011 document was equally unsatisfactory and we would request a clear and transparent response to how the LPC comments and input will be considered and incorporated appropriately within the PNA for 2014.</p> <p>P.18 The second bullet point under the functions of the Local Authority should be amended to read "Commissioning public health services from community pharmacists".</p> <p>P.28-29 Section 2.6 should be earlier in the document to identify the gaps. It is unclear why section 2.7 has been included here when this is context only or at the very least should be reference to the full discussion in the document later. There are very few references or evidence in this section which seems to indicate it is not based on any of the evidence previously presented. In section 2.7, the second sentence in the fourth bullet point needs to be reworded to "Pharmacists use these consultation rooms for a full range of services including MURs and NMSs" otherwise it seems to be saying that these rooms are only used for MURs and NMSs. In section 2.7, the fifth bullet point should read "Many pharmacists have taken on a wider public health role eg.</p>		
--	--	--	--	--

		<p>Locally commissioned to provide stop smoking services”.</p> <p>The expenditure in 2009/10 is very old on p.30 and we would strongly suggest more up to date figures are used. The reference to £35million spent on community pharmacy services would be more helpful if it was broken down about what pharmaceutical services the figure relates to. It would be more helpful if Hertfordshire figures were included within section 2.8 instead of national figures only.</p> <p>P.60 “50% of all MURs completed” is out of date and needs to be updated in line with the new national settlement:  <a href="http://psnc.org.uk/our-news/psnc-announcement-community-pharmacy-funding-settlement-201415/">http://psnc.org.uk/our-news/psnc-announcement-community-pharmacy-funding-settlement-201415/</a>.</p> <p>P.62 Please check that the statement “Pharmacists receive an initial payment of £750” is correct as the LPC believe that this no longer applies. Please check NMS guidance:  <a href="http://psnc.org.uk/wp-content/uploads/2013/06/NMS_guidance_Dec_2013.pdf">http://psnc.org.uk/wp-content/uploads/2013/06/NMS_guidance_Dec_2013.pdf</a> and Drug Tariff VIC:  <a href="http://www.ppa.org.uk/edt/November_2014/mindex.htm">http://www.ppa.org.uk/edt/November_2014/mindex.htm</a>.</p> <p>The LPC shared their response with all 248 community pharmacies in Hertfordshire and the following have expressed their support for the comments submitted:</p> <ol style="list-style-type: none"> <li>1. Asda Pharmacy Hatfield, AL10 0JP</li> <li>2. Bell Pharmacy, CM21 9QD</li> <li>3. Borehamwood Pharmacy, WD6 2NY</li> <li>4. Boots Royston High Street, SG8 9AG</li> <li>5. 		services at these pharmacies. The Hatfield and St Albans branches are to be refitted over the next six months.		
Email	Senior Partner Much Hadham Health Centre	<p>I would like to make some comments on section 4.1 (a) page 10 regarding the Much Hadham and Hunsdon Wards;</p> <p>1. I am surprised to see that this ward (as in 2011) is designated as relatively deprived. I have worked here for 25yrs and Much Hadham is one of the most affluent villages in the UK but, I appreciate that, the village of Hunsdon is not necessarily so.</p> <p>2. I feel that there is adequate community pharmacy provision for this area, particularly when you see that there is a Sainsburys in Harlow, Essex (with in-house pharmacy) and Addisons pharmacy (next to Princess Alexandra Hospital and often open until midnight) both approximately 3 miles from the centre of Hunsdon. In addition, there is a community pharmacy in Stansted Abbots. Both Harlow and Stansted Abbots are easy to get to by both road and public transport. Indeed, patients from Bishop's Stortford often have to travel to Addisons pharmacy in the evenings because of their late opening.</p> <p>3. We run a dispensing service which is extremely well liked and valued by our patients, with regular medication collection times in Hunsdon village hall attended by an experienced dispenser.</p>	04/12/2014	<p>The Deprivation score for this MSOA has been checked.</p> <p>The rationale is that dispensing doctors do not provide all the essential services of NHS pharmaceutical services. Alternative pharmacy provision is considered to be a significant travelling distance for patients. This view has not changed since the previous PNA 2011.</p>
Email	Healthwatch Hertfordshire	<p>Q1. Yes</p> <p>Q2. The information included is helpful. Suggested additions and clarifications are detailed below.</p> <p>Q3. It would be useful to have a clearer and more prominent indication of the geographical coverage of enhanced and locally commissioned services. The spread of contractors is detailed clearly, but it's not clear (beyond the total number) where the gaps are in terms of additional services. For example, it would be useful to know where the 17 Healthy Living Pharmacies are located. Perhaps notable gaps could be highlighted in the main</p>		<p>A list of HLP is provided in section 5.1.3</p> <p>Herts CC mapping aim to produce more detailed mapping of PH services</p> <p>Questionnaire data is included in Appendix M</p> <p>CPs are required by NHS England to undertake patient</p>

		<p>report? It is quite hard to understand from looking at the appendix, which only lists contactors which offer additional services.</p> <p>Q4. It's not clear how patients' views are represented within this, in its current form. Could there be more emphasis on usage of pharmacies and patient satisfaction? Will the data from the questionnaires in the appendices be included in the final version? This consultation asks the public to comment on the PNA document, rather than their use and satisfaction with current provision.</p> <p>Q5. No</p> <p>Q6. Pharmacies are community hubs and valued by the people who use them for their convenience and ease of access, beyond the dispensing service offered. The model of pharmacy provision needs to understand this aspect.</p> <p>Q7. N/A</p> <p>Q8.</p> <ul style="list-style-type: none"> <li>• More examples of partnership working and evidence of innovative models from other areas.</li> <li>• The level of ambition for improvement, innovation and integration could be clarified. Where activity and plans are described it's not always clear if this is current practice, a planned development or aspiration.</li> <li>• The 'Future Developments' section could include more detail of the specific role/relevance for pharmacy of current integration programmes.</li> </ul> <p>Q9. Pharmacies are increasingly key to the delivery of primary care and opportunities need to be taken to be ambitious around the role of pharmacies in easing the pressure elsewhere in the system. Innovative models from other areas could be examined to look at how we can be more creative in Hertfordshire. Pharmacies are valued sources of support in the community and</p>	<p>satisfaction questionnaire on an annual basis. Pharmacy services are described within the different elements of the NHS contract. Noted that some pharmacies also provide non NHS services. Examples of services provided by CPs included in the PNA. Literature review of CP services include as Appendix R. Noted</p> <p>Noted where gaps in services are identified and where pharmacy services can fill these gaps this is summarised in the summary table 32.</p> <p>This is for commissioners to decide.</p>
--	--	---	---

		offer more than dispensing services. As a trusted first point of contact with the health system, there is a lot of potential for them to support the wider health agenda. This seems like an opportunity missed to promote a more innovative approach and exploiting the potential of pharmacies to be a key player in primary care. The relationship between pharmacies and the rest of the care system is crucial and ways for GPs and other professionals to work better with pharmacies should be pursued. For example, better signposting to pharmacies could ease the pressure on more intensive services around the point of hospital discharge, when confusion around changes to medication is a readmission risk. And could more signposting and promotion of pharmacy services reduce pressure on GP services?		
Email	Associate Director Commissioning Primary Care Projects ENHCCG	<ul style="list-style-type: none"> <li>• Make prominent the role community pharmacy could potentially play in improving dementia care</li> <li>• Reference NHS five year forward view</li> <li>• Reference ENHCCG draft primary care strategy</li> <li>• Where reference to the quality of local pharmacy services is made are there any metrics/intelligence reviewed to support this (other than patient survey).</li> </ul> <ul style="list-style-type: none"> <li>• 60,000 patient safety medn incidents Jan 2005 – June 2006: are there any more up-to-date figures? What % of these involved community pharmacy?</li> </ul> <ul style="list-style-type: none"> <li>• Bottom page 42 GP extended hours – there are also extended hours currently provided in some localities as part of winter pressure services (however these are seasonal not permanent)</li> <li>• Page 44 ENHCCG also has a GP Acute In Hours Visiting Service (AIVS)</li> </ul>		<p>Dementia section included in PNA in section 6.3.6 NHSE 5 year forward view &amp; ENHCCG primary care strategy included in the context section of the PNA. 5 December 2014

Dear Pauline,

**Hertfordshire Pharmaceutical Needs Assessment (PNA)**

We are writing on behalf of the Local Pharmaceutical Committee. We would like to express our serious concerns about the process that led to the development of the draft PNA consultation in 2014.

We appreciate that this has been a difficult time for you and your team as you have transitioned from the Commissioning Support Unit to the two Clinical Commissioning Groups in Hertfordshire. We also recognise that the transition from PCT to NHS England and Public Health functions has been challenging and that this is a new area for the newly formed Health and Wellbeing Board. We wish to work closely with the Health and Wellbeing Board to ensure that their priorities are supported and met by community pharmacy in Hertfordshire.

Since May 2014 the LPC has continually been requesting an update on the PNA process. There has been no meeting of the steering committee that includes the LPC. The LPC has been as supportive as possible within this process encouraging all contractors to respond to the pharmacy questionnaire including sending it hard copy to each pharmacy. The draft consultation document first came to the LPC (and the entire steering committee) on 19 September 2014 and then the consultation document was published on 7 October 2014. This is an unacceptably short timescale especially as the document runs to over 100 pages and the steering group members were not prepared for when the draft would be coming to them for comment. The LPC raised concerns about the incomplete nature of the document particularly in reference to the public health section but wanted to be pragmatic

and support the consultation in going forward. There was one update paper sent to the group in late August 2014. There was no opportunity for all members of the steering group to feed in and make the PNA a more robust document. We feel that this has led to a repeat of the previous PNA document from 2011 when there have been significant changes. The LPC is concerned that the lack of consultation and discussion with key stakeholders has led to a biased and challengeable document that does not address appropriately pharmaceutical need within Hertfordshire. We would like to request reassurance that the document will be fully updated following consultation from all key stakeholders and that the LPC will be involved in this process.

We would like to request reassurance that the document will be fully updated following consultation from all key stakeholders and that the LPC will be involved in this process.  
Yours sincerely,

Girish Mehta  
Chair Hertfordshire LPC

Helen Musson  
Executive Officer Hertfordshire LPC

Cc: Jim McManus, Director of Public Health, Hertfordshire County Council  
Joel Bonnet, Deputy Director Public Health, Hertfordshire County Council

**East and North Hertfordshire  
Clinical Commissioning Group**

Girish Mehta & Helen Musson  
Hertfordshire Local Pharmaceutical Committee  
Unit 8 Weltech Centre  
Ridgeway  
Welwyn Garden Centre  
AL7 2AA

Dear Girish & Helen

Hertfordshire Pharmaceutical Needs Assessment (PNA)

Thank you for your letter of 5 December 2014 expressing concern about the PNA development. As you know the PNA process, which locally began in April 2014, is defined by the regulations including the need to undertake a 60 day consultation which we have undertaken from 7<sup>th</sup> October 2014 until 7<sup>th</sup> December 2014.

Communications supporting the development of the PNA have been through a “virtual steering group” where stakeholders and steering group members have effectively contributed. Members of the virtual steering group including the LPC, HCC Public Health topic leads, Herts Healthwatch, Herts Valleys and East and North Herts Clinical Commissioning Groups, and NHS England area team and Public Health England have been invited to contribute and have been involved at stages throughout the PNA’s development and continue to be so.

We are grateful for the LPC’s comments to the formal consultation which together with those of all other stakeholders have been considered and taken into account, and further discussed at our PNA stakeholder meeting at County Hall on 11 December 2014. Thank you again for attending that meeting where we were also able to discuss your concerns more fully.

The engagement of the LPC and its constituent members is valued and it is recognised that community pharmacy can make a significant contribution to meet the health needs of the population of Hertfordshire, particularly as more healthcare is delivered with a primary care focus.

As you know we have arranged a final stakeholders' meeting on 27<sup>th</sup> January 2015, that you are attending which will allow us to see that all comments and agreed amendments have been incorporated into the final PNA.

Yours sincerely

Pauline Walton  
Assistant Director & Head of Pharmacy & Medicines Optimisation (Interim)  
East & North Herts CCG

CC Jim McManus Director of Public Health, Herts County Council  
Dr Joel Bonnet Deputy Director of Public Health, Herts county Council.

# Management of patients with hypertension:

general practice and community pharmacy working together

Community pharmacy is a highly skilled resource that is untapped. As the dispensing process is further mechanised and drug costs squeezed, pharmacists could be performing more complex tasks than currently by contributing to clinical care and health improvement. This could enable GPs to change their case mix, allowing primary care to achieve more, as set out in the recent joint statement from the Royal College of General Practitioners (RCGP) and the Royal Pharmaceutical Society (RPS).<sup>1</sup> In Scotland, the Chronic Medication Service is a good example and will, ultimately, encompass prescribing. From 2015 all schools of pharmacy will have prescribing competencies embedded in their curricula. In England, the Medicines Use Review (MUR) and the New Medicine Service (NMS) represent a first step in the process.

However, the NHS is limited by capacity and cost. It is seeking to transfer work from expensive environments, like hospitals, to more cost-effective environments, like general practice. At Woolpit Health Centre (Richard West's practice), the consultation rate per patient/year has increased from 5.6 to over 6, and average time per patient has exceeded 11 minutes during the last 5 years.

Pharmacists are trained in the use of medicines and to reduce risk, and are effective at ensuring best practice is implemented. A shift to risk management needs to go alongside taking on more clinical responsibility for the care of patients.

General practice and community pharmacy could work together on the management of the chronic disease with the greatest prevalence in the UK: hypertension. The British Hypertension Society says that 32% of men and 29% of women are affected.<sup>2</sup> At Woolpit Health Centre 2400 patients, out of 14 000, have the condition. Accepting the argument in Wald and colleagues' work,<sup>3,4</sup> that there is a case for reducing the blood pressure of the entire population aged >50/55 years, this is a key area of work for prevention in which workload will increase. In addition, Barbara Starfield<sup>5</sup> argued that, although this is an important area of work, costly medical skills are being wasted on hypertension and lipid management. The NHS Health Check approach is symptomatic of this.

Clear guidance is available from

---

“... pharmacists could be performing more complex tasks than currently by contributing to clinical care and health improvement. This could enable GPs to change their case mix, allowing primary care to achieve more ...”

---

the National Institute for Health and Care Excellence (NICE) for managing hypertension.<sup>6</sup> The Quality and Outcomes Framework (QOF) requires that patients get:

- their blood pressure measured every 9 months;
- advice about diet and exercise;
- weight management;
- their cardiovascular disease (CVD) risk assessed, as appropriate;
- a review/monitoring of the drug being taken; and
- discussion about adherence and side-effects.

All of the tasks are within the competencies of a pharmacist.

It would be sensible to divide patients into two groups:

1. those who only have hypertension and are controlled on three drugs or fewer; and
2. the remainder.

Our intention is to distinguish between those patients not taking medication as recommended, and those with physiologically complex needs.

Community pharmacy could be asked to manage the first group. After diagnosis or stabilisation in general practice, the pharmacist would be asked to monitor

the patient and carry out all the necessary investigations. If the patient's condition changes they should be referred back to the practice. The patient's hypertensive therapy should then be maximised along an agreed pathway. If the patient at any time develops a secondary condition, or any complications, then the practice would take back responsibility.

There are a number of obstacles to overcome, notably the lack of an appropriate communication system between pharmacy and general practice. Clear protocols need to be adopted to determine which professional would be responsible for the patient at the key stages of the pathway, like the current shared-care agreements between hospital consultants and GPs for certain drugs.

A cultural change would also be required. There is no doubt that where clinicians know each other and communicate well, the patient benefits. Most surgeries refer to a limited number of hospitals, if they believe the patient requires their particular expertise. The same would need to happen with general practice and community pharmacy. The pharmacy would need to take long-term responsibility for the patients it is monitoring, requiring some form of list system. This will mean a change in the risk profile for pharmacists, including appropriate indemnity insurance.

There will be a cost associated with this. Contractors will need to be paid at a premium in the first few years, for establishment costs and to encourage pharmacies to take

“There are a number of obstacles to overcome, notably the lack of an appropriate communication system between pharmacy and general practice.”

on the work. Surgeries currently receive some money for managing patients via the QOF. However, changing where patients are managed will not reduce the costs or workload in general practice, because work will be transferred from secondary care to replace them. It will create capacity, which is just as important. The transfer of money needs to come from secondary care.

The other major challenge is finding the time for the pharmacist to do this work. Currently the pharmacist's work can be divided into four areas:

1. dispensing medicines;
2. management of the business;
3. provision of pharmacy services, some pre-booked; and
4. advice to patients.

This work would mean that the pharmacist would not be as available to patients who walk in off the street, so different pharmacies may have to specialise in different services. It seems clear that pharmacists need to delegate more of the work of dispensing either to a pharmacy technician, or to automated technology, in order to free up time in line with the thinking in the Responsible Pharmacist Regulations. [These regulations came into force in October 2009, creating a legal duty for the pharmacist to ensure the safe and effective running of the pharmacy at all times.]

The community pharmacy's contractual framework needs to encourage automation of the dispensing process. There needs to be a robust mechanism in place to ensure that contractors get paid when they take on extra work, allowing the pharmacy to take the risk and general practice to release the work, knowing that they can maintain income by taking on work from secondary care. Over the past 3 years work has been transferred, but practice incomes have fallen while hospital budgets have increased. This will cause resistance to any change as everyone tries to protect their income.

Good communication between GP and

pharmacy is essential, ideally by sharing of the patient record. Despite the recent announcements about the NHS going paperless by 2017, a paper-based system (like that for maternity care) could be a good short-term solution, backed up by letters. In addition:

1. a clear and simple pathway should be developed for all involved to follow;
2. there should be an acceptance that one practice may choose to work with one pharmacy and vice versa, with the pharmacist even performing the work in the GP practice; and
3. a pilot should be undertaken that would be subject to full academic evaluation. This should not hamper work that is obviously viable where professionals are prepared to cooperate. The NHS cannot afford to wait for another decade to see progress across primary care.

The NHS needs to continue to evolve if it is to be able to cope with the changing expectations of the people who use it.
