

The SAFER Patient Flow Bundle

S - Senior Review.

A – All patients will have an **expected discharge date (EDD)**
clinical criteria for discharge (CCD)

F - **Flow of patients** –arrival of the first patients on specialty wards by 10:00

E – **Early discharge** - 33% of all patients will be discharged from base inpatient wards before midday

R – **Review** - weekly multi-disciplinary review of ‘stranded’ and patients

Red and Green bed days

*A **RED** day is when a patient receives little or no value-adding care to help them towards their discharge.*

*Examples of **RED** days*

- A planned investigation, clinical assessment, procedure or therapy does not occur*
- The patient is in receipt of care that does not require a hospital bed*
- The medical care plan lacks a consultant approved expected date of discharge*
- There is no consultant approved physiological and functional clinical criteria for discharge in the medical care plan*

A **Green day is when a patient receives value adding care that progresses them towards discharge*

A **Green day is a day when everything planned or requested gets done*

A **Green day is a day when the patient receives care that can only be given in and acute hospital bed*
